Describe Problem or Map anomaly in detail.
 Can we get the full tiles(highlighted Grids)? Also can we get the tiles of ocean that are missing(Called out as missing tiles)? I'd like to be able to print aerials that are complete(No white space).

PASTE SCREENSHOTS HERE:

LAR-IAC's response to the Problem:

Full imagery coverage should be found in 'extended_shoreline' folder in the replacement DVD. The 'Missing Tiles' are not part of the LAR-IAC delivery and unfortunately cannot be included here.
