City / community:	Manhattan Beach
APN / TB page / name of attached shapefile:	

Describe Problem or Map anomaly in detail.
I received the corrected coastal tiles. The Jp2's work fine, I processed the tif's into SID's, which also work fine, but some of the tif tiles will not show in ArcMap, nor can I build pyramids for them. Strangely, the "not showing" tiles are in one folder, while the "coastal – ok" are also corrected tiles, which show fine, but they're in another folder. It's probably an ArcMap problem, not one with the data, but I've tried everything and needed to ask if anyone knows what's going on. Thanks!
