

Z/1 image storage (portable and removable)...Like a proud father, Milan with the Digital Mapping Camera (DMC)

Flight plan map with a sample image (Staples Center)...Milan inspecting the camera system under the plane.

The DMC is really 8 digital cameras in one (you can just make out all 8 here)...DRP staff and the camera operator.

All in all it was a nice visit to see this very high tech camera system (one of three) that is being used for the LAR-IAC digital ortho photo acquisition.
