

Technology and Product Update - LARIAC

July 28th, 2016

Agenda

- New Technical Manager
 - Amanda Tovey
- Product Updates
 - CONNECT
 - ArcGIS Desktop Plugin
 - ArcGIS Pro Plugin
 - WFS
- Deployment Options – Current
 - IPA
 - Gateway
- Deployment Options – Optional (available through Pictometry)
 - Web App Builder Widget
 - Image Service
- CONNECT360
- FutureView

New Technical Manager

Product Updates

CONNECT Explorer?

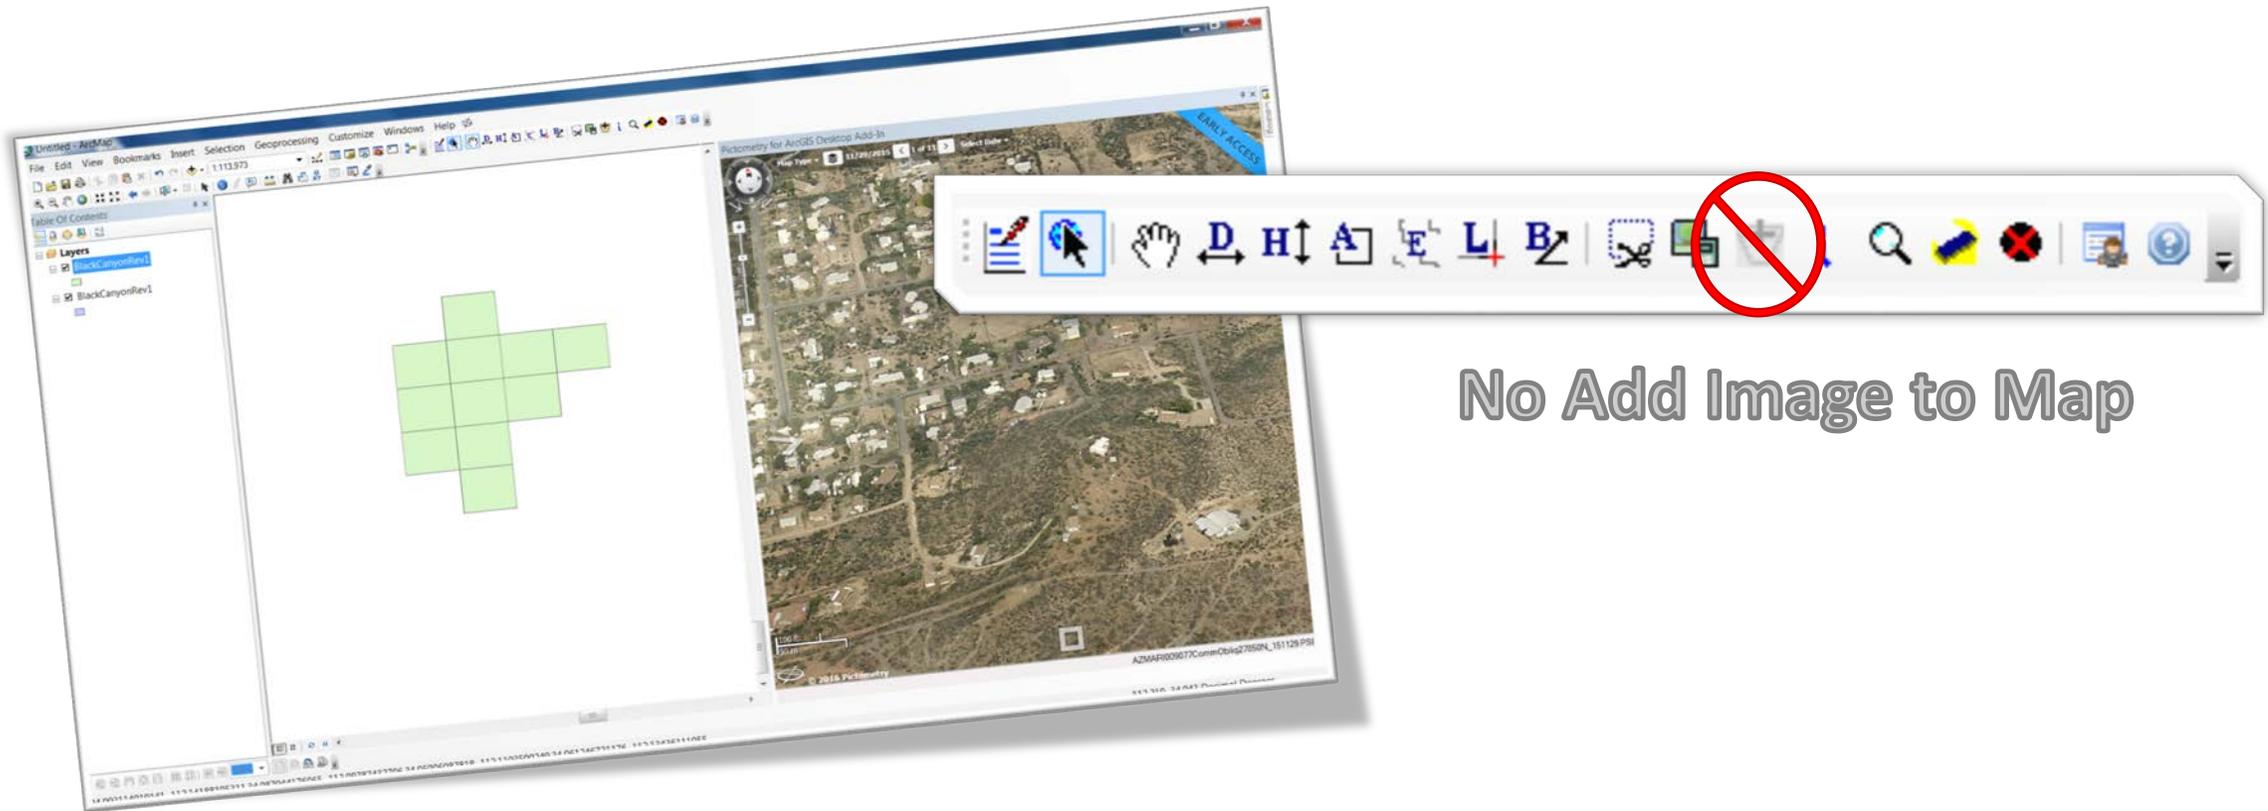

Product Updates

CONNECT Platform

Product Updates

- ArcGIS Desktop Plugin
 - 10.4 has not been released – add image to map functionality not working
 - 10.3.1 version functional in ArcGIS Desktop 10.4 *except* add image to map

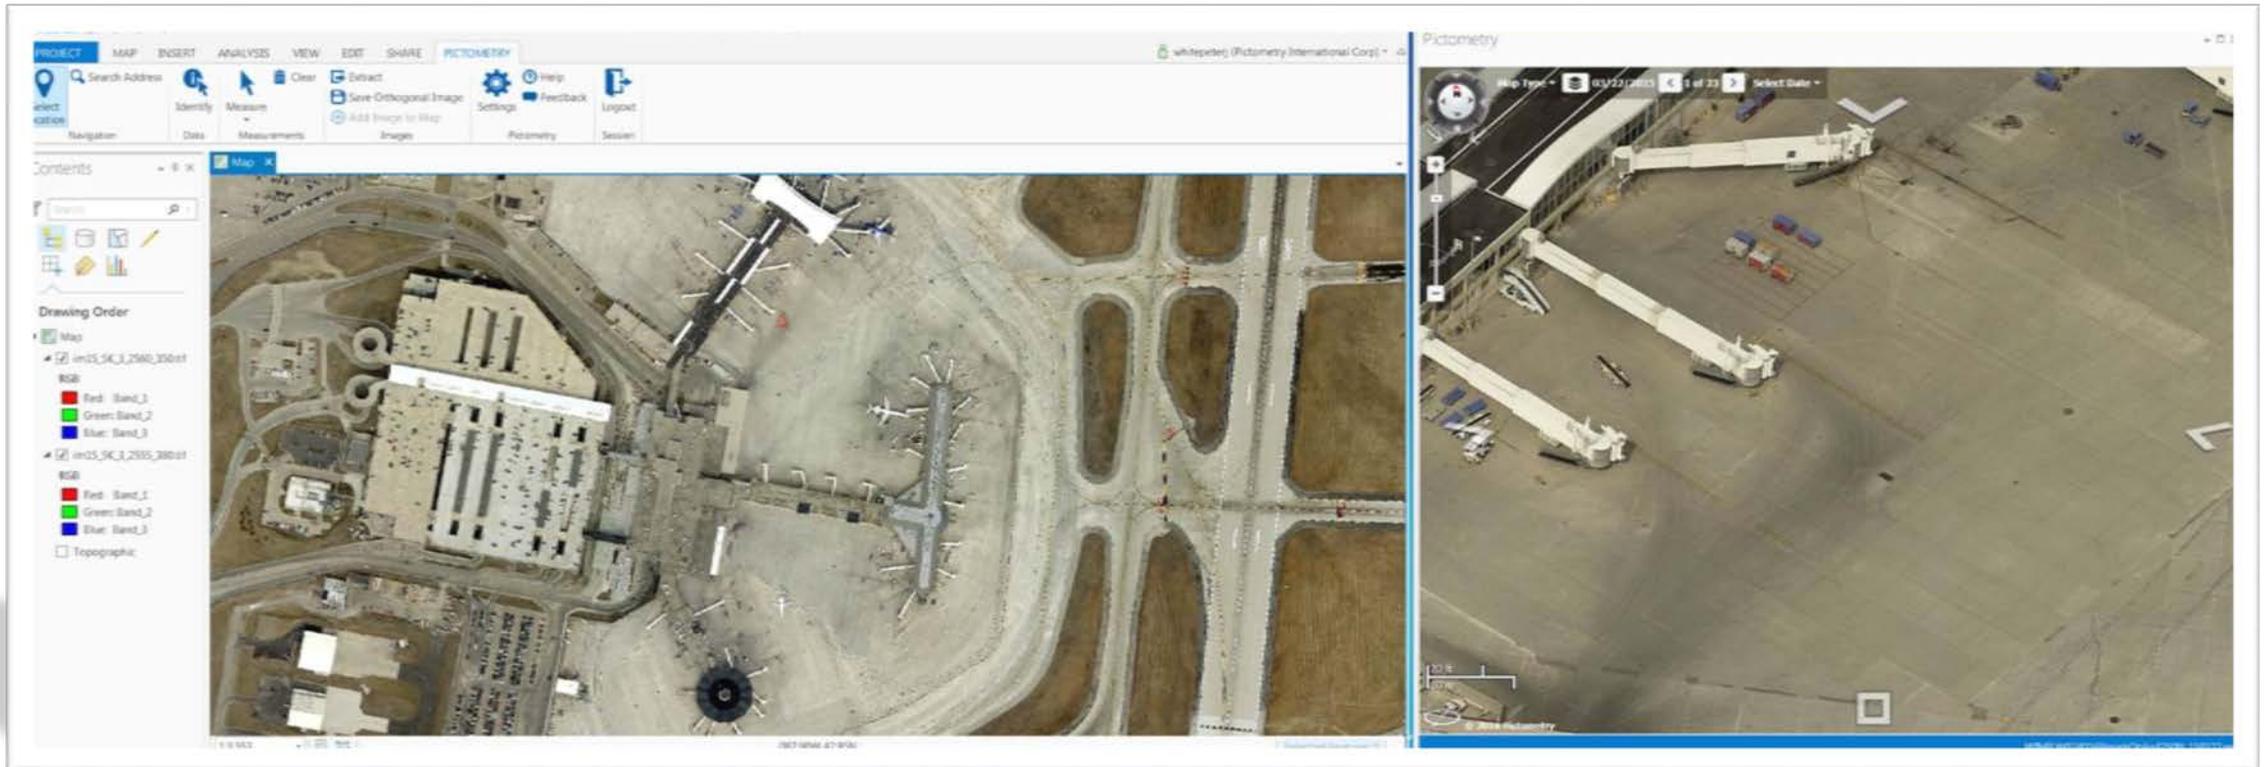

No Add Image to Map

Product Updates

- ArcGIS Pro Plugin
 - Plugin is in prerelease, but will function the similar to ArcGIS Desktop
 - If interest, please contact me and we can keep you updated on release information

Product Updates

- WFS for CONNECT
 - MUST be accessible over public internet
 - Can authenticate using HTTP/Windows Authentication only

PICTOMETRY CONNECT WEB FEATURE SERVICES REQUEST FORM

Please complete and return to DeploymentSpec@pictometry.com. (Use the **Up** and **Down** arrow keys to move from field to field.)

Pictometry Customer Organization Information

Organization Name:

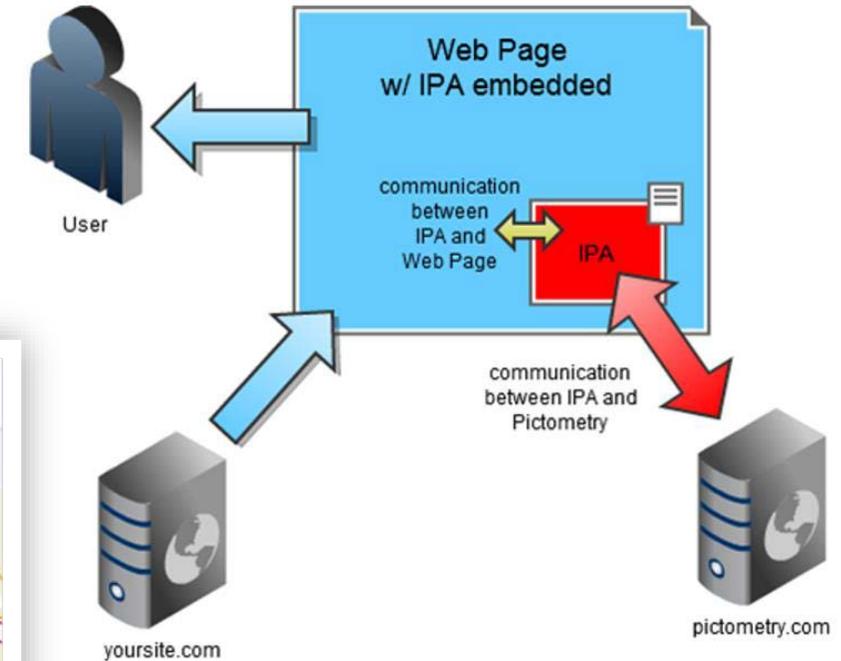

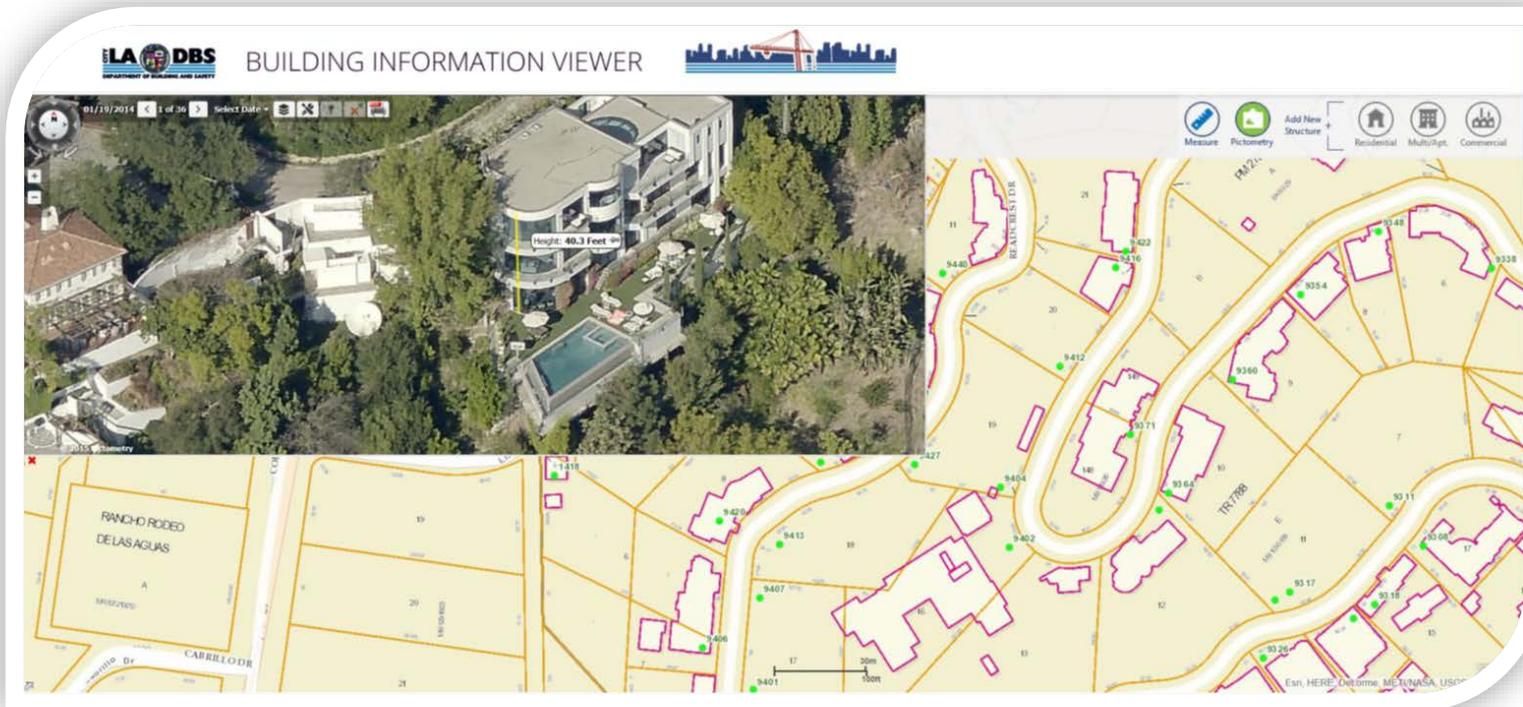

GIS Contact Information:

- Name:
- Phone Number:
- Email address:

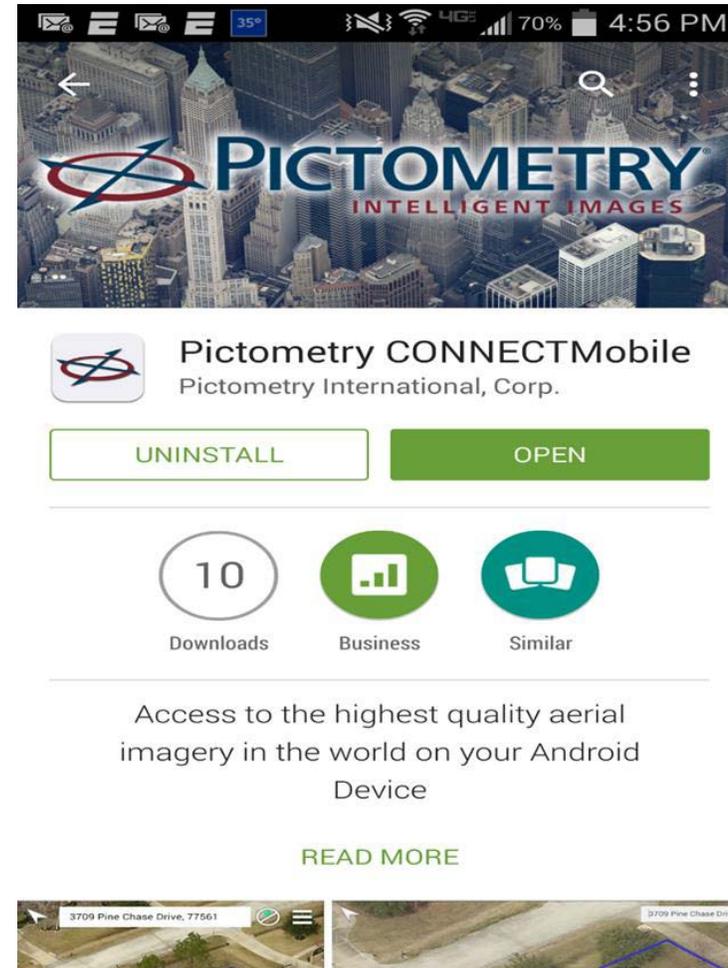

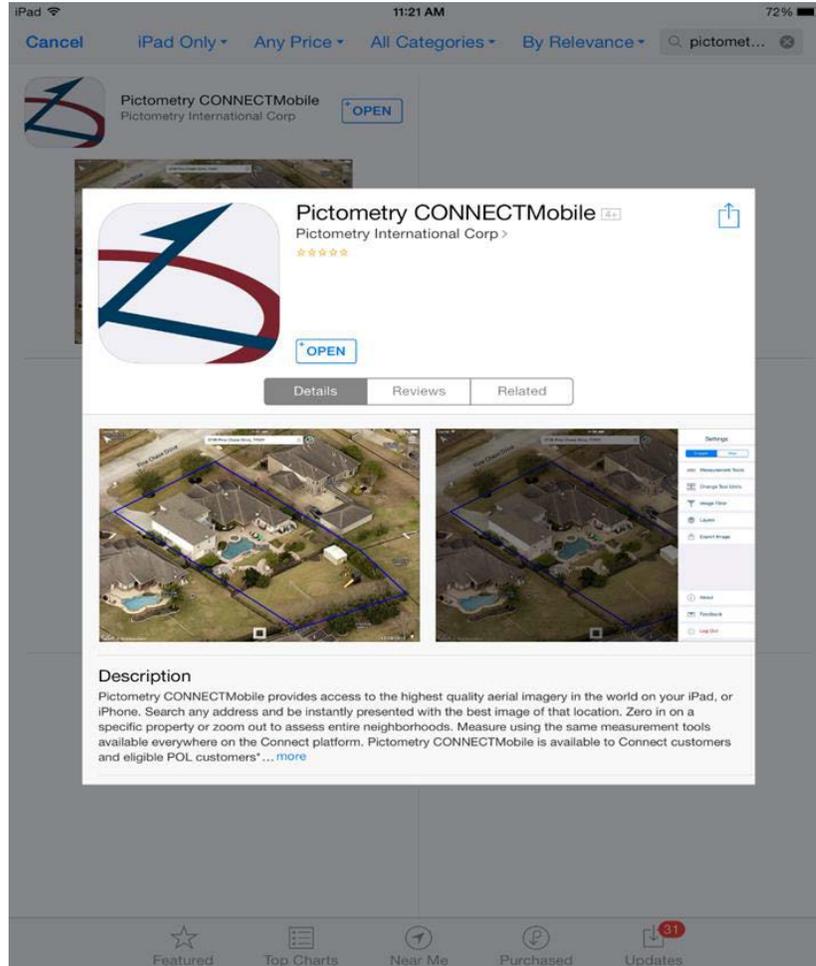

Deployment Options - Current

- Integrated Pictometry Application (IPA)
 - Web integration with Pictometry hosted obliques and orthos
 - Uses JavaScript and iframes
 - Can be internal or face the public

Deployment Options – Current

CONNECTMobile

Deployment Options – Optional

- Gateway

- Secure API that is used to integrate property focused cropped JPEGs into a workflow
- Used commonly in web based reporting and database population

Parcel Profile Report
Report date: Tuesday, April 28, 2015 1:52 PM

APN: 4201-006-020
Address: 5539 S GARTH AVE, LOS ANGELES, CA 90056

Site Address : 5539 S GARTH AVE
City : LOS ANGELES CA 90056
Owner : MASSEY, JOYCELYN T
Mailing Address : 5539 S GARTH AVE
Mailing City : LOS ANGELES CA 90056
Lot Size Sq Ft : 8,752
Lot Size Acres : 0.2
Use Code : 0100
Use Type : Residential
Use Description : Single
Legal Description : TRACT # 16705 LOT 92

Tax Rate Area : 04623
Transfer Date : 2012-06-19
Last Sale Date : 20120619
Last Sale Amount: 626005

Building 1

Design Type : 0120	Bedrooms : 3
Quality Class Shape : D85B	Baths : 4
Year Built : 1955	Bldg Sq Ft : 2,133
Units : 1	Effective Yr : 1955

Deployment Options – Optional

Wood Buffalo Gateway Example

The screenshot displays a web application interface for a fire report. The browser address bar shows the URL: `tremap.rmwbc.ca/fire-report.htm#add71e41ee0581970a34430f1d1e338`. The page header includes the Wood Buffalo logo and navigation links: FIRE MAP, FIRE REPORT, STATUS UPDATES, FAQ / INFO, and social media share icons.

The main content area is titled "Property Results" and features a map of the incident location. The map shows a grid of streets including Bishop Street, Hughes Avenue, and Huggard Street. A black dot on the map indicates the specific property location.

Below the map, a "North View" section contains two side-by-side aerial photographs. The left photograph is labeled "Before Fire (2015)" and shows a well-maintained residential property with a house and a driveway. The right photograph is labeled "After Fire (2016)" and shows the same property in a state of complete destruction, with only the charred remains of the structure and debris visible.

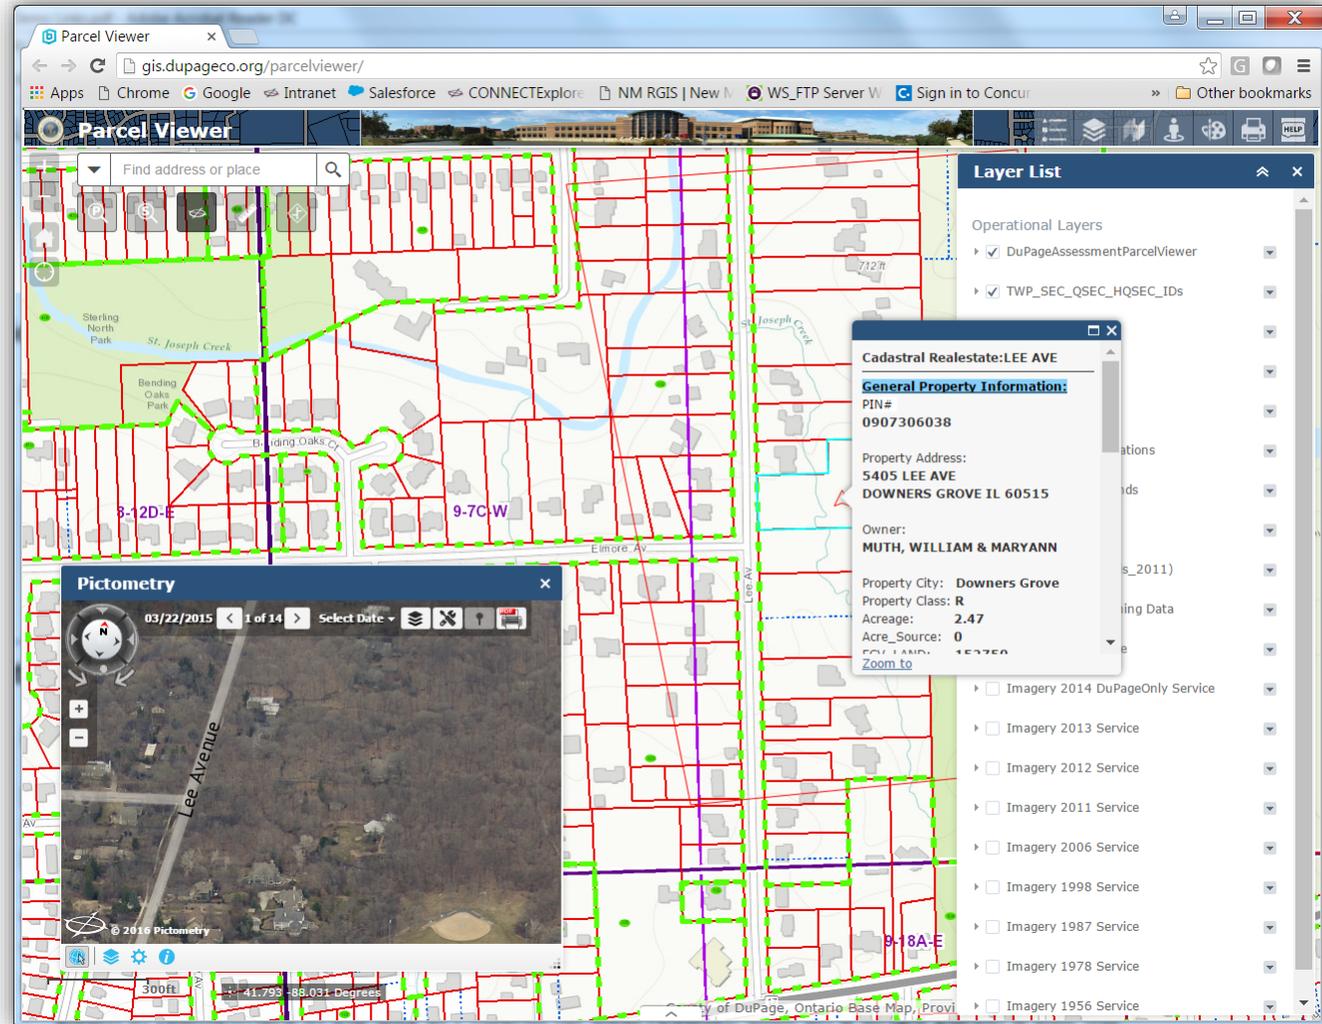

Key details from the "Property Results" section include:

- Location:** 7206 HUGHES AVENUE FORT McMURRAY
- Coordinates:** -111.33910404826 56.6989548813635
- Legal Description:** 1053969ET
- Rapid Damage Assessment (RDA):** Destroyed
- RDA Comment:** (Empty field)
- View in Map:** [View this address in the Fire Map](#)

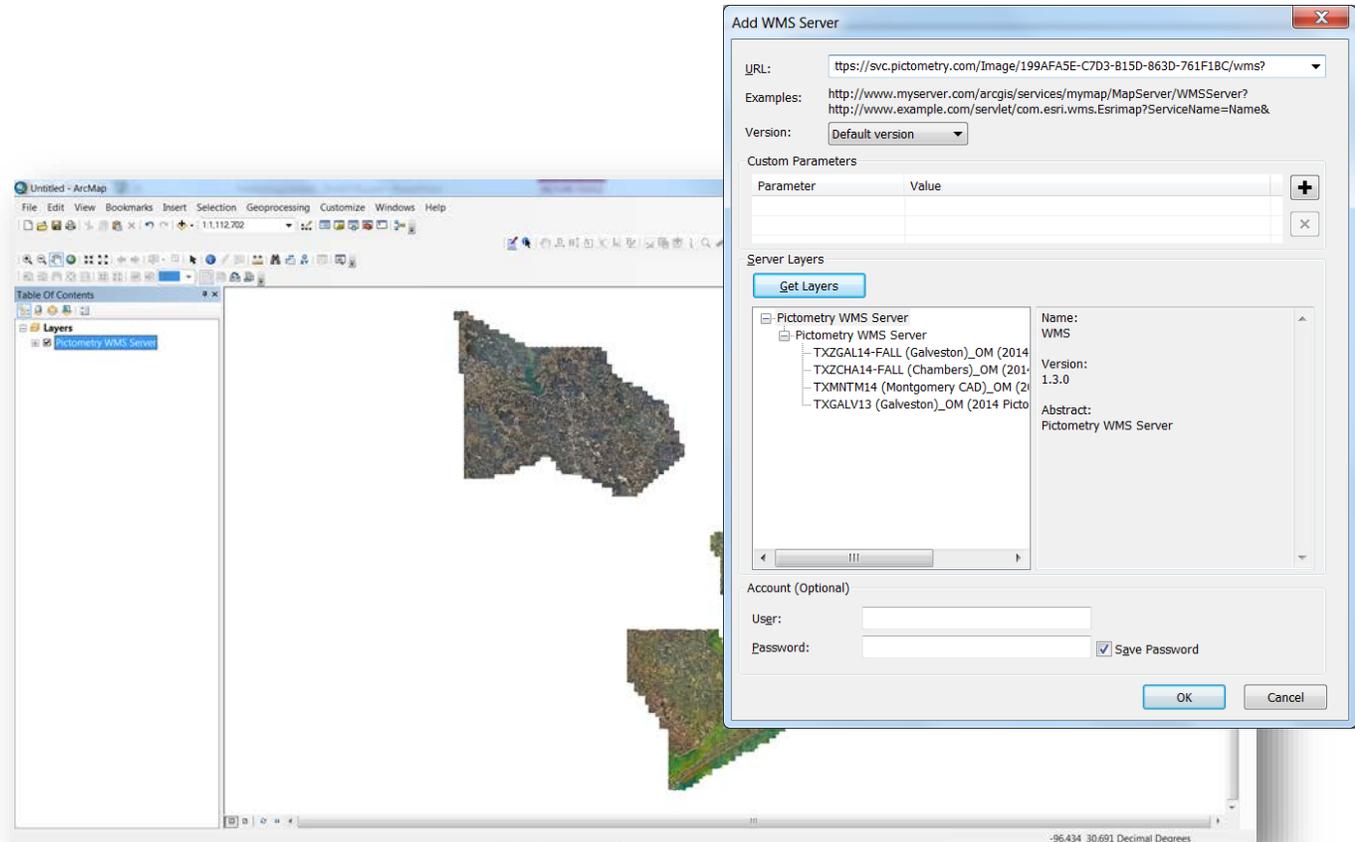

Deployment Options - Optional

- Esri Web App Builder Widget
 - Custom widget built out in Web App Builder
 - Deploy internally or externally
 - Contact us if you would like to setup a 90-day trial

Deployment Options - Optional

- Image Service
 - WMS, WMTS and TMS supported
 - Hosted, stored and managed by Pictometry
 - Option available to ingest third party historical imagery

CONNECT360

CRITICAL360®

When seconds save lives, access accurate property and building intelligence, inside and out.

CONNECT360

CONNECT360™ brings it all together:

- Understand the incident location and surrounding area
- Display GIS layers
- Locate nearby resources
- Pre-plan for crisis scenarios
- Train using actual information from your jurisdiction
- Provide guidance to first responders arriving on scene and manage the incident response
- Detailed 3D floor plans can be searched by building/floor/room
- Calculate distance and height measurements on building interiors and exterior images
- Navigate through the building floor plan and from image to image
- View high resolution 360-degree imagery of every room

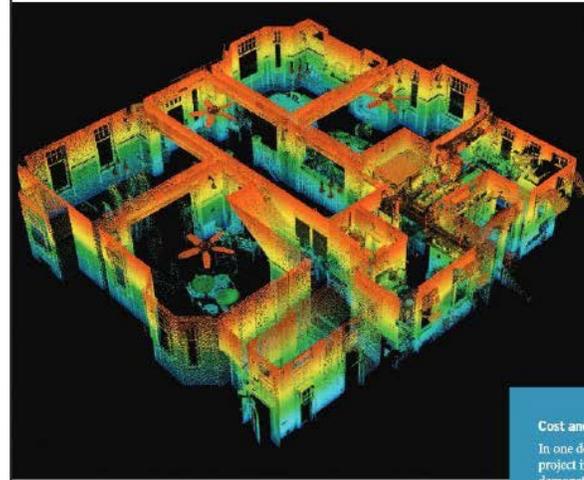

CONNECT360

Trimble Indoor Mapping System (TIMMS) Used for Data Capture

Rapid Response / Public Safety / Law Enforcement

Accurate and up to date spatial information of public buildings offers many safety benefits to responders and to the public:

- Detailed 360 degree imagery provides responders with total situational awareness before entering. Layout and contents are fully known, meaning no surprises.
- Data is available through the internet behind your own firewall to multiple decision makers in multiple locations, enabling informed decisions.
- Data enables detailed preparation and training for specific buildings / areas.

TIMMS scan and resulting maps/models

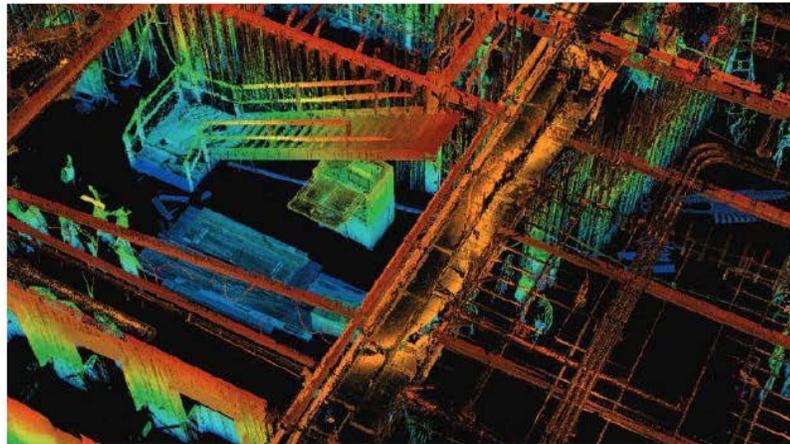

Cost and Time Savings

In one documented public safety project in a high school, TIMMS demonstrated a 50% cost savings & 92% reduction in delivery time over traditional data acquisition methods.

applanix
A TRIMBLE COMPANY

TIMMS™

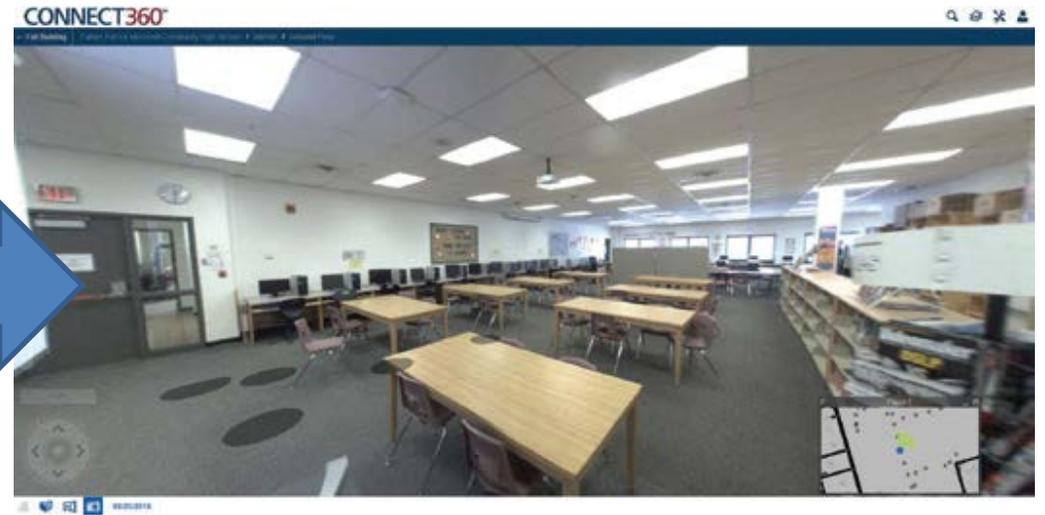

Data Acquisition

- Push cart platform
- Lidar, video and positioning sensors
- Positioning
 - Align at known coordinates for ~20min
 - Using GPS, or
 - Surveyed control point
 - Indoor (GPS-denied) positioning x, y and z
- Data Capture
 - 360 video captured every 1m (adjustable)
 - Push-broom, continuous lidar
- High productivity
 - Mission planning
 - Route
 - Obstacles: Doors, furniture
 - Continuous data collection at walking speed
 - Speed can vary to accommodate conditions
 - Stopping ok
 - 30,000sqft/hr or 45 rooms/hr
