

LAR-IAC4 Status and User Group Meeting

March 19, 2015

LOS ANGELES • REGION
LAR|AC
imagery acquisition consortium

Agenda

- LARIAC Status Update
- Vendor Presentations
 - Pictometry
 - Dewberry
- LARIAC Data Discussion
- LA County GIS Repository Access
- LARIAC Training Schedule
- Other County Programs
 - CAMS
- Questions
- Lunch
- Pictometry Technology Update

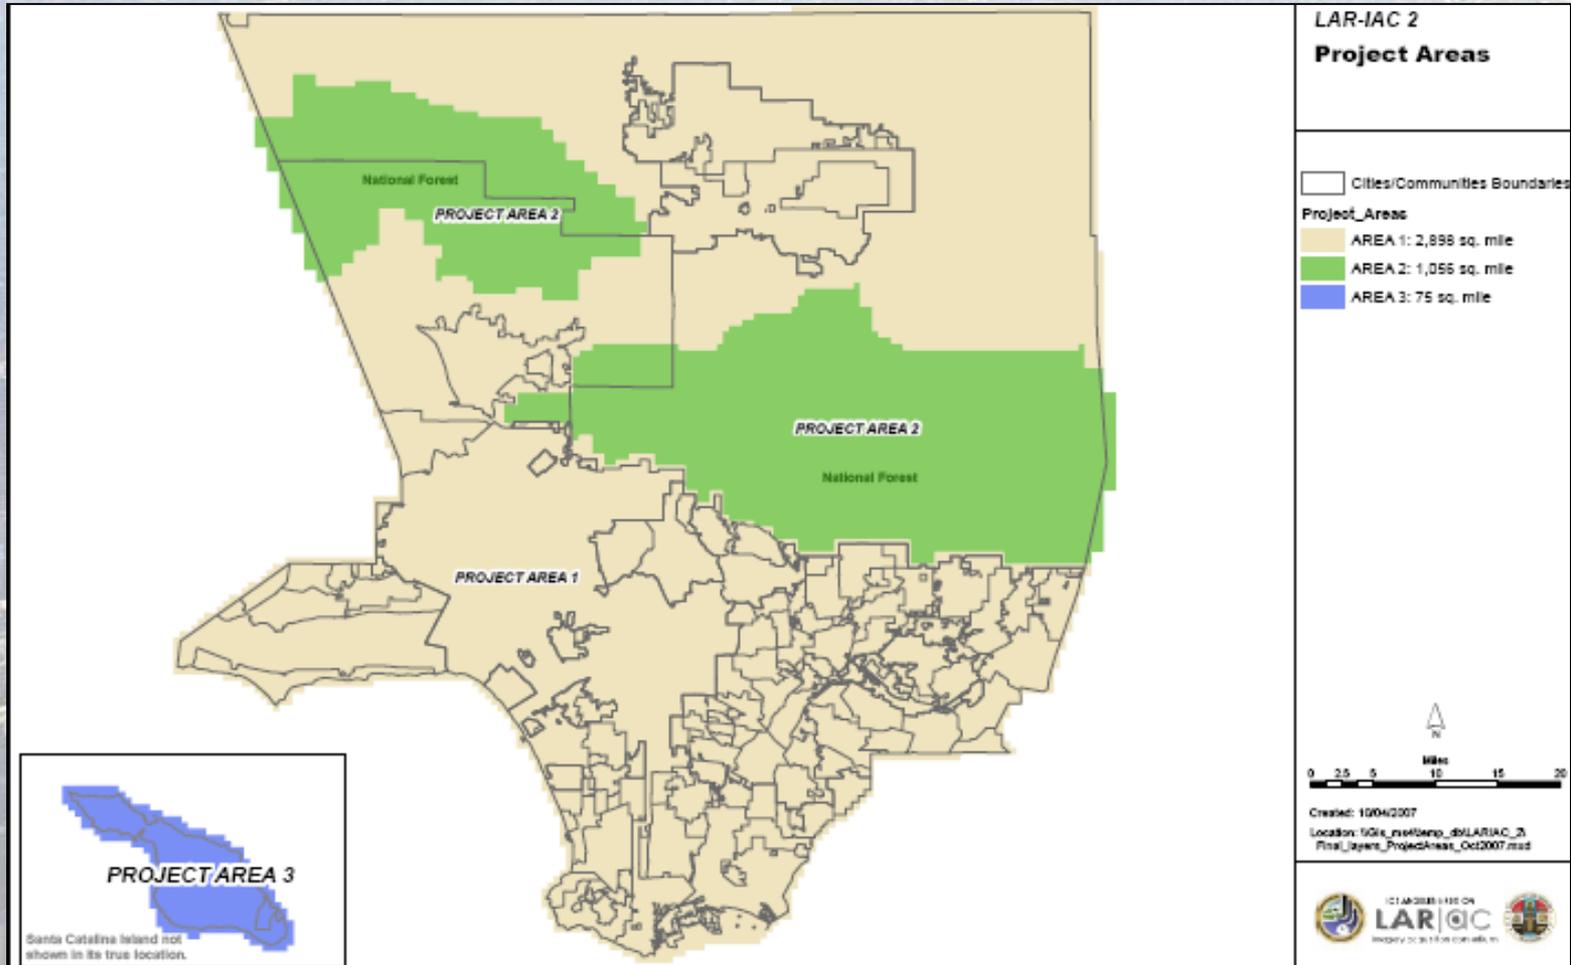

What is LAR-IAC?

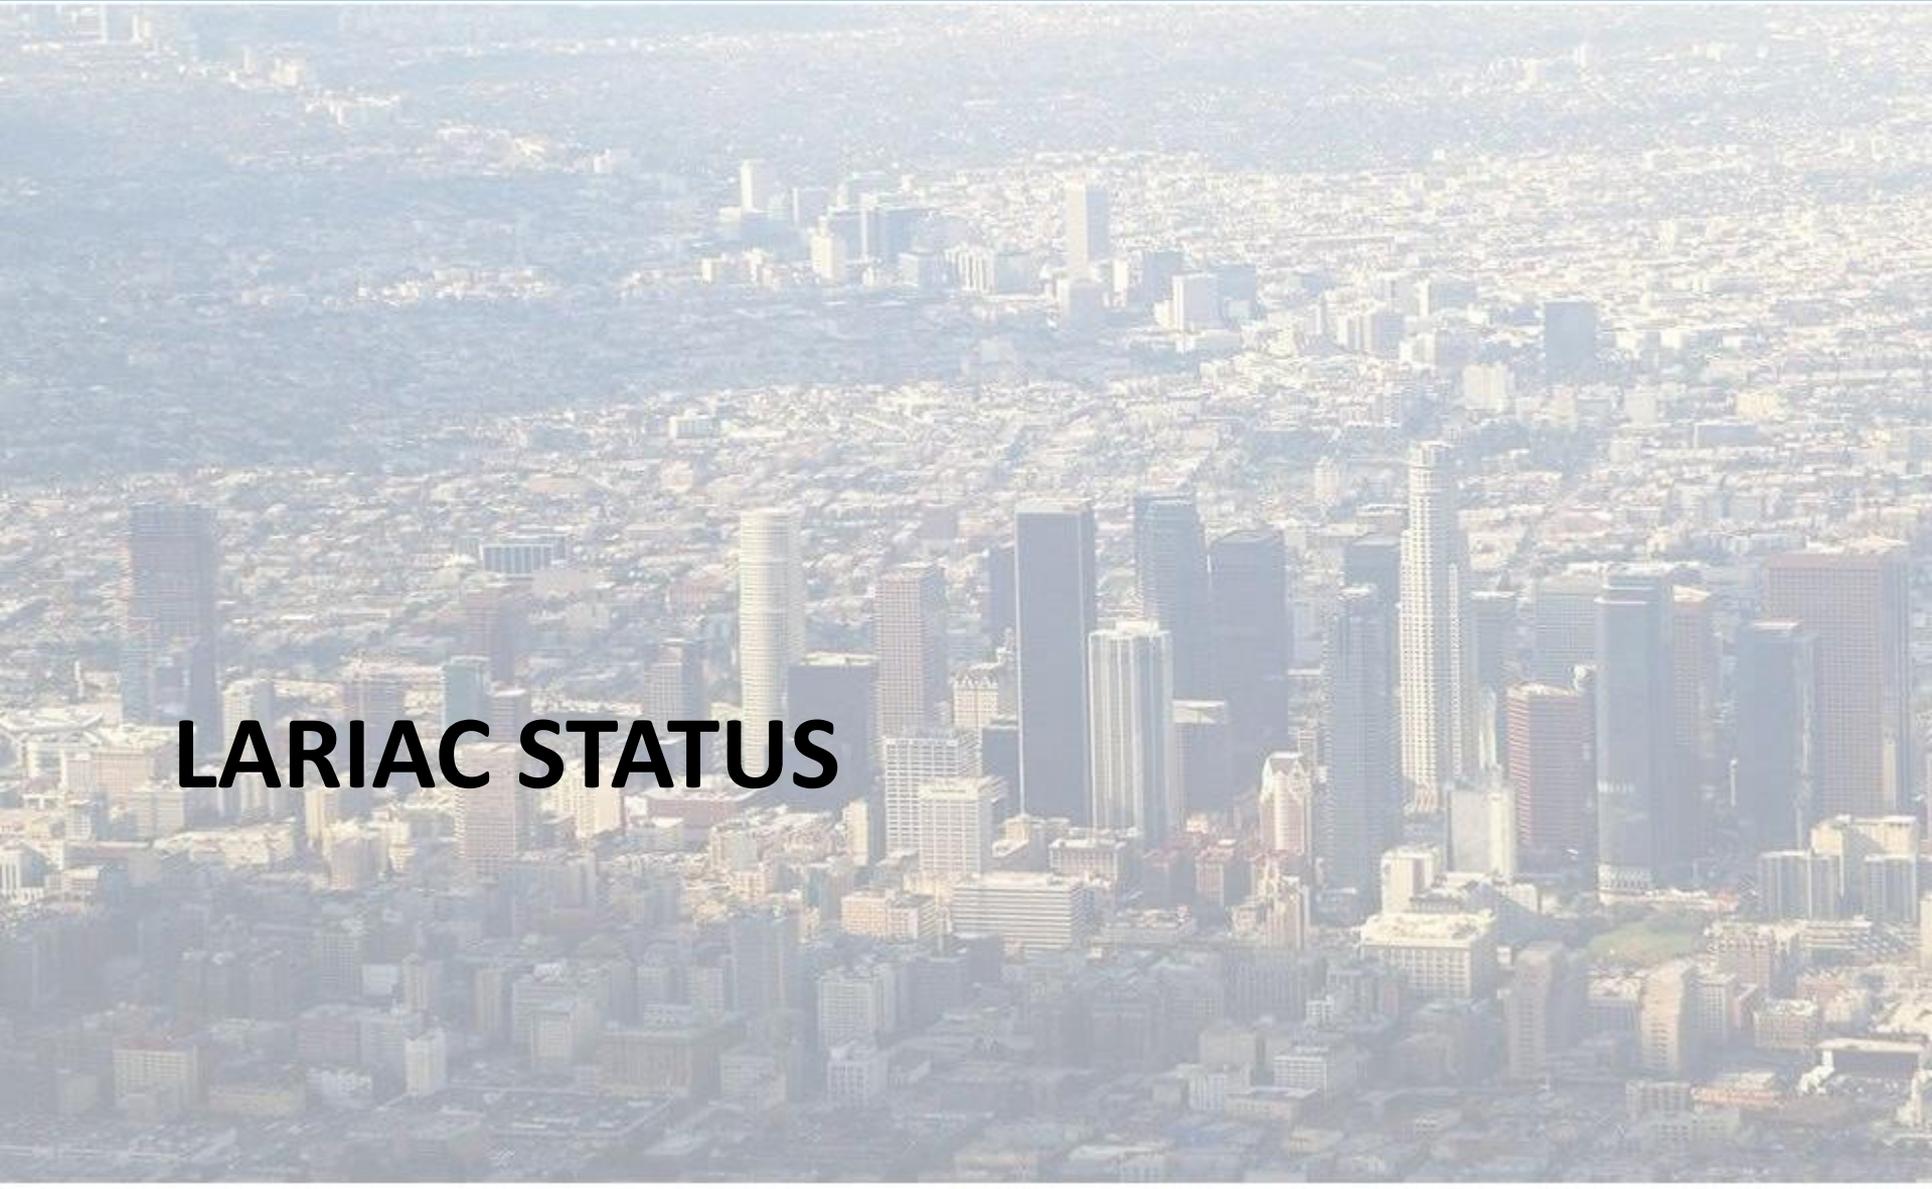

- Los Angeles Regional Imagery Acquisition Consortium (LAR-IAC)

“LAR-IAC is multi-jurisdictional purchasing arrangement that enables participating local governments and agencies to benefit from combined economies of scale to efficiently and cost-effectively acquire high definition aerial data.”

- Established in 2003 by LA County Regional Planning and Chief Information Office.

LARIAC Geographic Scope

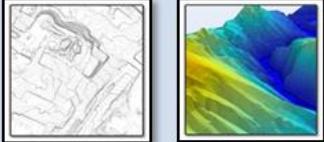

An aerial photograph of a city skyline, likely San Francisco, showing a dense concentration of skyscrapers and buildings. The text 'LARIAC STATUS' is overlaid in the lower-left quadrant of the image.

LARIAC STATUS

Current Participants

Participant	LOI	Participant	LOI	Participant	LOI
LA County Sanitation Districts	X	City of Arcadia	X	City of Long Beach	X
Los Angeles Air Force Base	X	City of Azusa	X	City of Los Angeles	X
Catalina Island Conservancy	X	City of Bellflower	I	City of Lynwood	I
US Geological Survey	X	City of Beverly Hills	X	City of Malibu	X
Los Angeles County	X	City of Burbank	X	City of Manhattan Beach	X
Rio Hondo Community College	X	City of Carson	X	City of Monrovia	I
California State University Long Beach	X	City of Cerritos	X	City of Norwalk	X
California Polytechnic University Pomona	X	City of Claremont	X	City of Pasadena	X
Newhall Land and Farming	X	City of Covina	X	City of Pomona	I
California Department of Transportation	I	City of Culver City	X	City of Rancho Palos Verdes	X
Las Virgenes Municipal Water District	I	City of Downey	X	City of Redondo Beach	X
Los Angeles County Metropolitan Transit Authority	X	City of Duarte	X	City of San Dimas	X
Loyola Marymount University	X	City of El Segundo	X	City of Santa Clarita	X
		City of Gardena	X	City of Santa Monica	X
		City of Glendale	X	City of South Pasadena	I
		City of Hawthorne	I	City of Temple City	X
		City of Hermosa Beach	X	City of Torrance	X
		City of Industry	X	City of Vernon	I
		City of Inglewood	X	City of West Hollywood	X
		City of La Canada Flintridge	X	City of Westlake Village	X
		City of Lakewood	X	City of Whittier	X

LAR-IAC4 Product Matrix

<u>Data Types</u>	<u>LARIAC1</u> 2006	<u>LARIAC2</u> 2008	<u>LARIAC3</u> 2011	<u>LARIAC4</u> 2014
Orthogonal Imagery (4-inch) 	X (including Infrared)	X	X	X (including Infrared and 1-foot imagery from 2012 and 2013)
Oblique Imagery 	X	X	X	X
Building Outlines 		X		X
Elevation Data 	X			X
Derived Data <ul style="list-style-type: none"> • Tree Canopy • Solar Insolation • NDVI (Permeability) • Slope • <u>Hillshade</u> • Height 	X			X

Current Finances

- Current LARIAC4 costs - \$4.4 million
 - Oblique: \$1.2 million
 - Ortho: \$811,000
 - Buildings: \$135,000
 - LIDAR costs: \$1.6 million
 - Contract Amendment will be executed next week
 - QAQC: \$600,000
- \$4.7 million in commitments
 - \$2.8 million received
- Delay penalty assessed - \$45,750

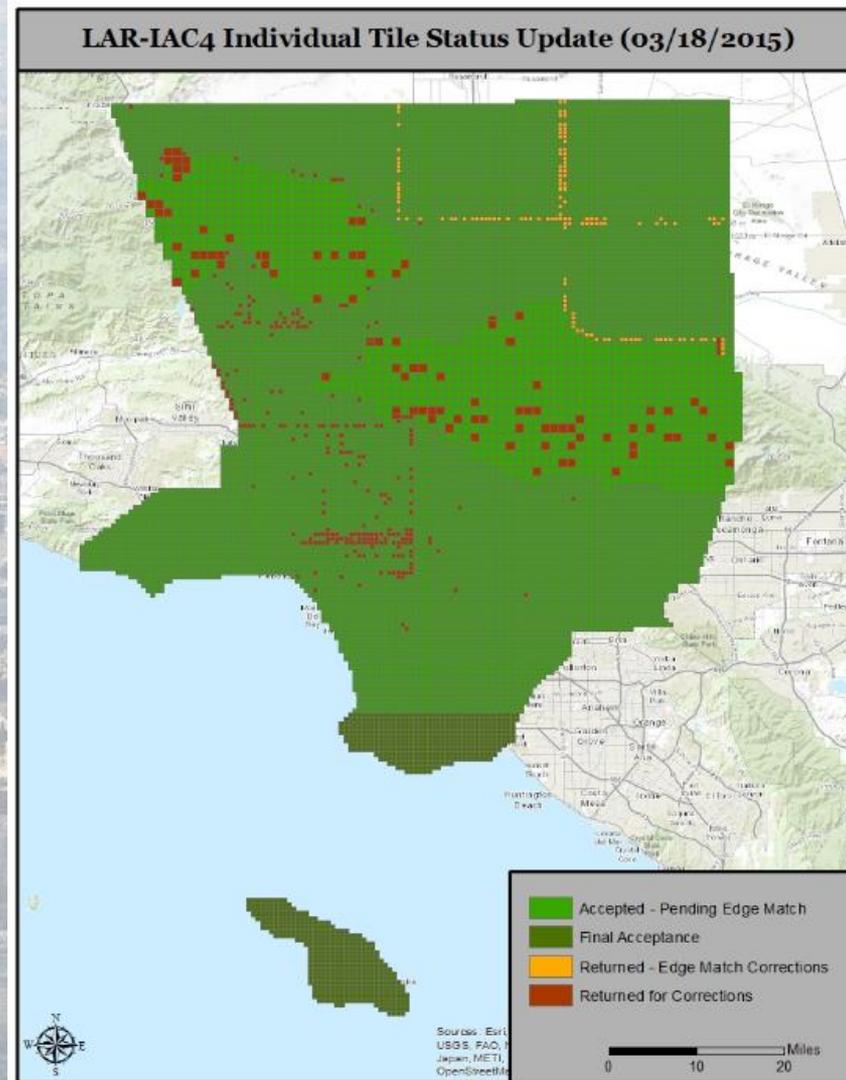

LIDAR Status

- County amending the current LARIAC contract to add LIDAR
 - 2 points/meter squared Countywide
 - 1 foot contours
 - .las formats, DEM, DSM, DTM
- LA County DPW is piloting the automated delineation of micro-watersheds and required quality.
 - Meets state criteria for water quality
 - May need to increase quality (DPW would cover increase)
- Flights start September 2015.
- Delivery 1st quarter 2016 (currently March 31, 2016)

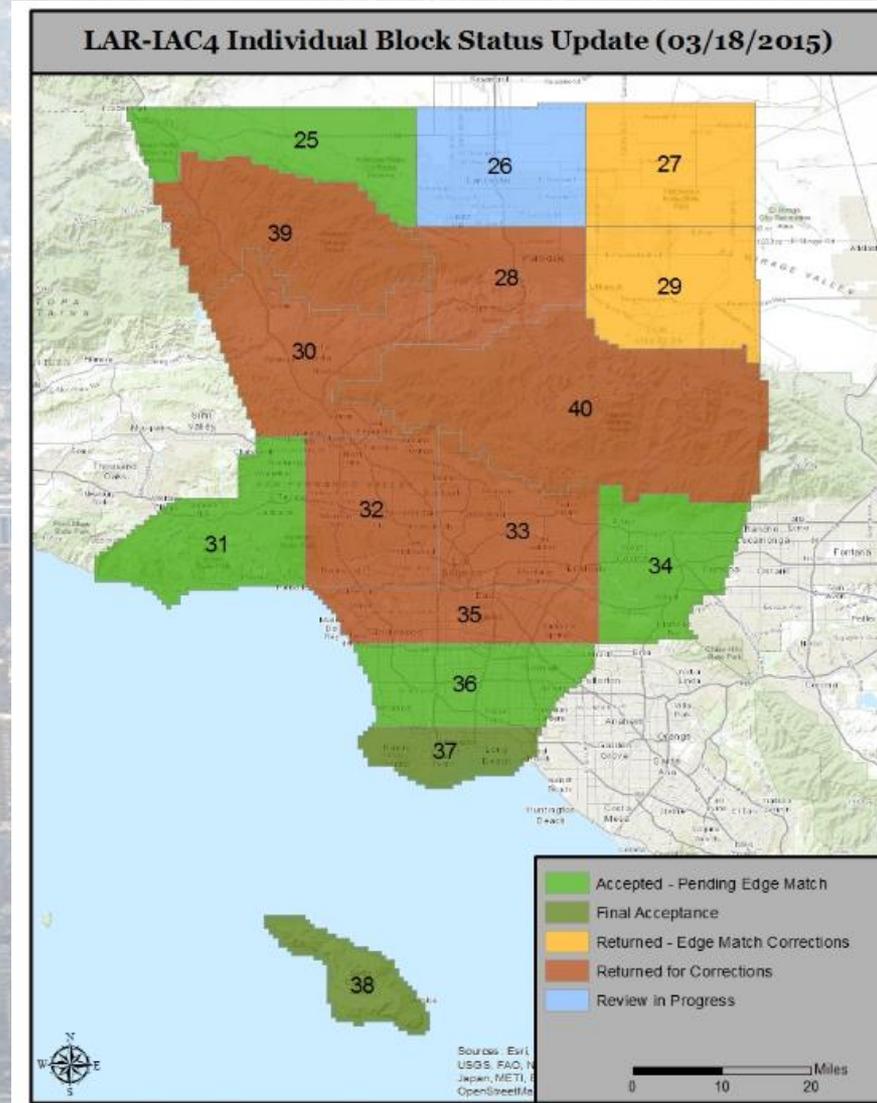

Delivery Schedule

- Oblique Imagery
 - Delivered a while ago via Pictometry Online
 - Also will come on hard disk
- Ortho imagery
 - 2012 and 2013 imagery will come on hard disks with 2014.
 - Deliveries will start next week.
 - Deliveries will be completed by end of April
- Building Outlines
 - Delivered September 2014.

Tile QAQC Status

Ortho Processing Status

Initial Deliveries

- Deliveries to be shipped by the end of March
 - City of Arcadia
 - Catalina Island Conservancy
 - City of Azusa
 - City of Claremont
 - City of Covina
 - City of Duarte
 - City of La Canada Flintridge
 - City of Malibu
 - City of Temple City
 - City of Westlake Village
- Other deliveries will ship as data passes QA
 - Anticipate complete delivery by late April/Early May

Questions/Comments?

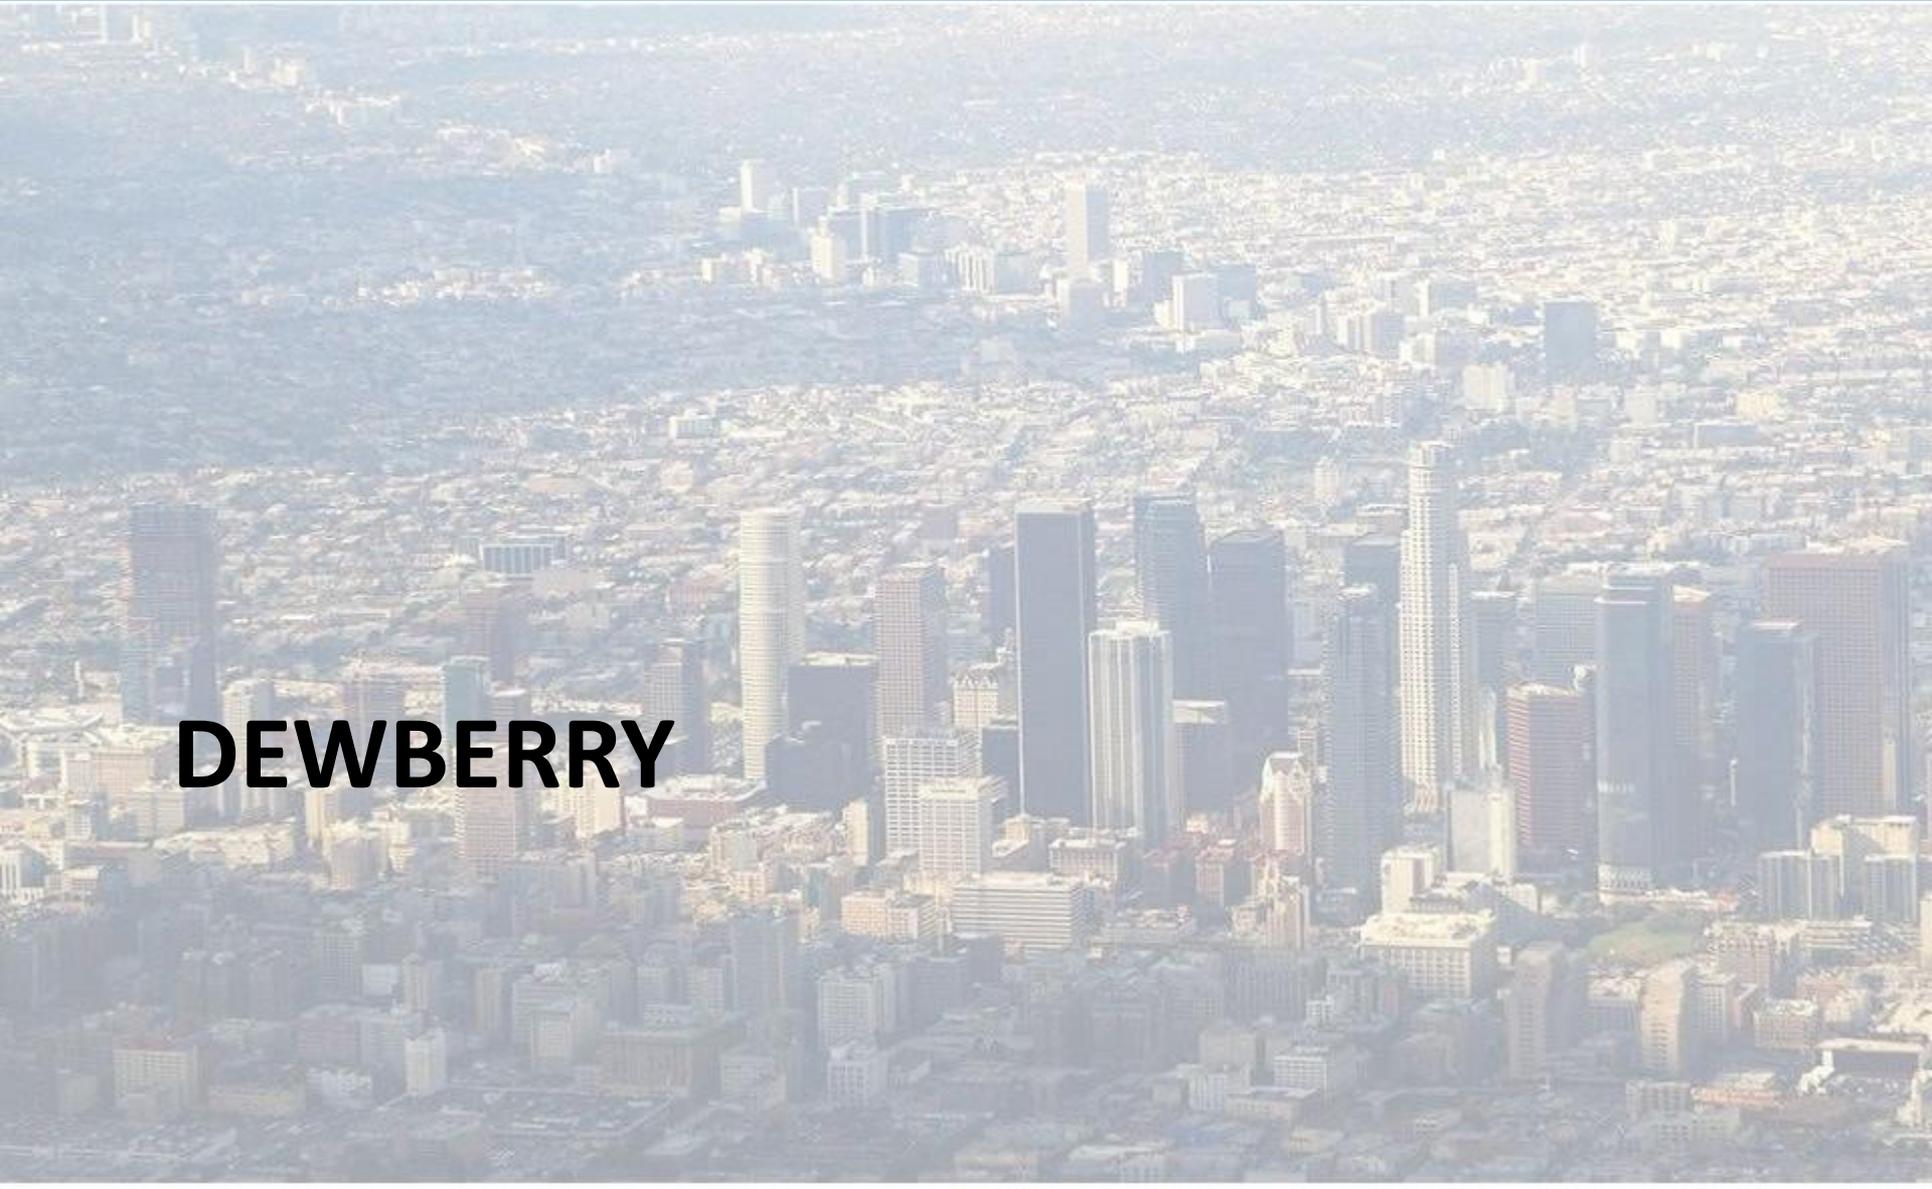

Prepared by:
Los Angeles County

An aerial photograph of a dense urban skyline, likely San Francisco, showing numerous skyscrapers and a vast expanse of city buildings. The text "LARIAC VENDOR UPDATES" is overlaid in the lower-left quadrant of the image.

LARIAC VENDOR UPDATES

An aerial photograph of a dense urban area, likely San Francisco, showing a vast expanse of buildings and skyscrapers. The foreground is dominated by a cluster of tall, modern skyscrapers, while the background shows a more densely packed residential or commercial area that fades into a hazy horizon. The overall scene is a high-angle, wide-area view of a major city.

PICTOMETRY & SANBORN

An aerial photograph of a city skyline, likely San Francisco, showing a dense cluster of skyscrapers in the foreground and a vast, hazy urban area extending to the horizon. The word "DEWBERRY" is overlaid in large, bold, black letters on the left side of the image.

DEWBERRY

What are you getting?

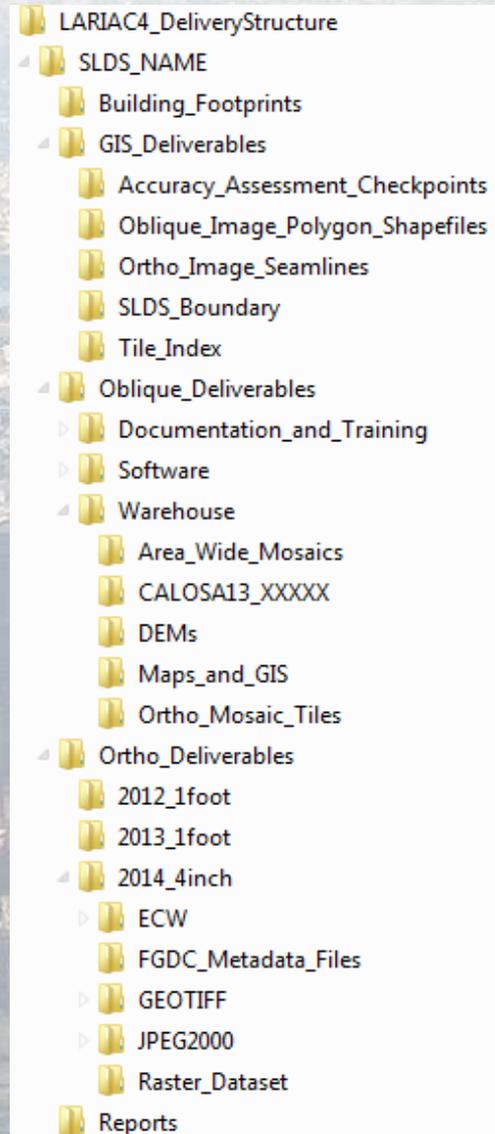

LARIAC DATA DISCUSSION

Data Delivery Formats

Delivery Product	Format 1	Format 2	Format 3	Format 4
Orthophoto (color) (4" and 1')	GeoTIFF & JPG2000 (raw format – 180 Mb per tile)	File Geodatabase (compressed, seamless)	ECW mosaics (compressed, seamless)	Map Services from LA County.
Pictometry oblique imagery (4" and 1')	Medium Compressed JPG format	Online Access		
Building Outlines	ArcGIS shapefile	ArcGIS Shapefile of new construction, changes, and demolition		
Digital Terrain Model (2015)	.las format files (RAW)	Digital Elevation and Surface model (rasters)	Other related formats

Oblique Image Access

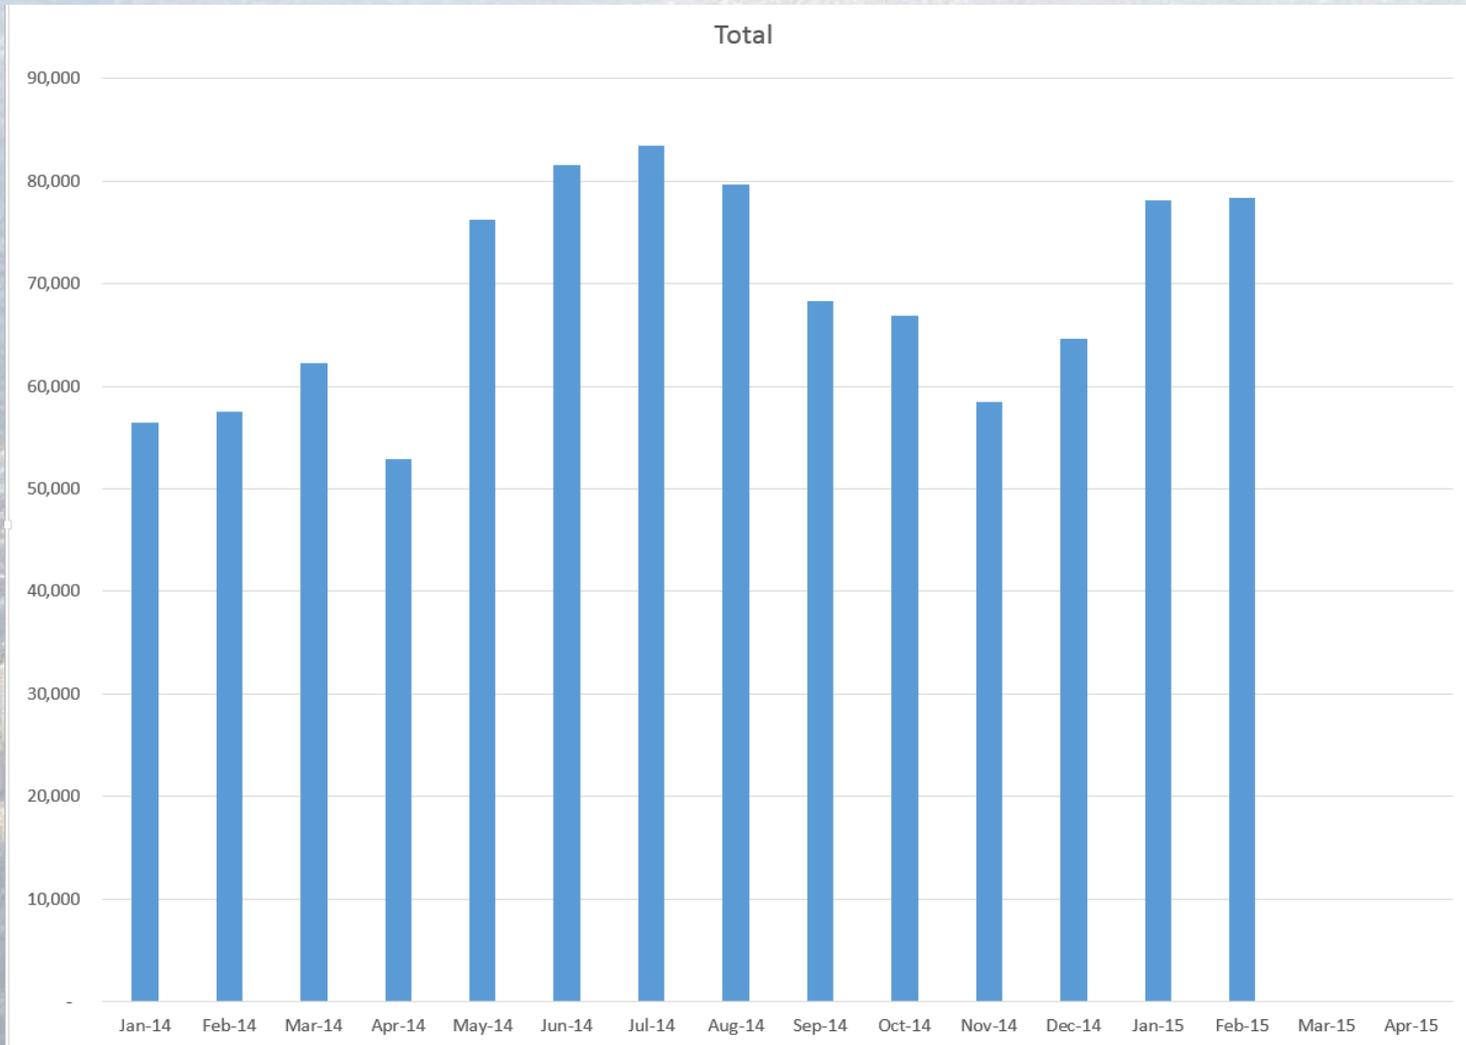

Method	Description	Use
Electronic Field Study (EFS)	Desktop Application connecting to data delivered on hard disk	Disconnected situations. Use rarely.
Pictometry Online (POL)	Online Application for access	Day to day use – will be deprecated soon – can pass parameters to it.
Pictometry Connect Explorer	Online Application for Access	Day to day use – also mobile - can pass parameters to it.
Pictometry iPad Application	Mobile Access	Mobile Access
ArcMap Plugin	Connect to POL inside ArcMap	Desktop GIS users
Integrated Pictometry Application (IPA)	Embed oblique imagery inside applications	Enhance existing apps.
Pictometry Gateway	Get multiple shots at one time.	Reporting

Where do I find these?

LARIAC Access Methods

Pictometry

- There are a number of methods to access Pictometry data:
 - Desktop (Electronic Field Study – EFS) – requires either a local data store or NIW
 - ArcMap Integration (Pictometry Connect for ArcMap)
 - ArcMap 10.2
 - PictometryforArcGISDesktop10.2-Connect (zipped installation files)
 - Pictometry ArcGISDesktop Connect 10-2 Guide (pdf file)
 - Pictometry ArcGISDesktop Connect 10-2 ReleaseNotes (pdf file)
 - Pictometry Online: <http://pol.pictometry.com>
 - Pictometry Connect iPad Application
 - From your iPad, go to the App Store and search for "Pictometry Connect Mobile"
 - Pictometry IPA (Integrated Pictometry Application)
 - See below for an example of how this works.
 - Click here to download (zipped .php file) – contact Pictometry to get the key files.
 - Pictometry Connect Explorer
 - For POL: [Click here to download the zipped .xaml file](#)
 - For Pictometry Connect Explorer: [Click here to download the zipped .xaml file](#)

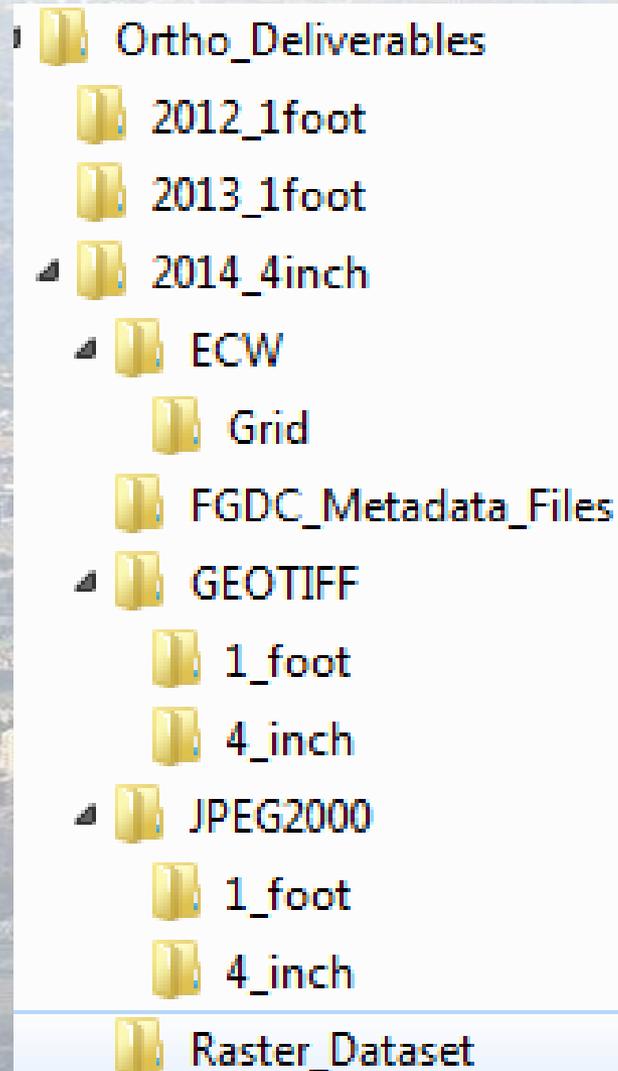

- Pictometry IPA (Integrated Pictometry Application) – see below

Oblique Imagery

- Warehouse and EFS
 - For disconnected situations
 - If you don't join LARIAC5
 - You need EFS software (included) to use.
 - Very large

Ortho Imagery

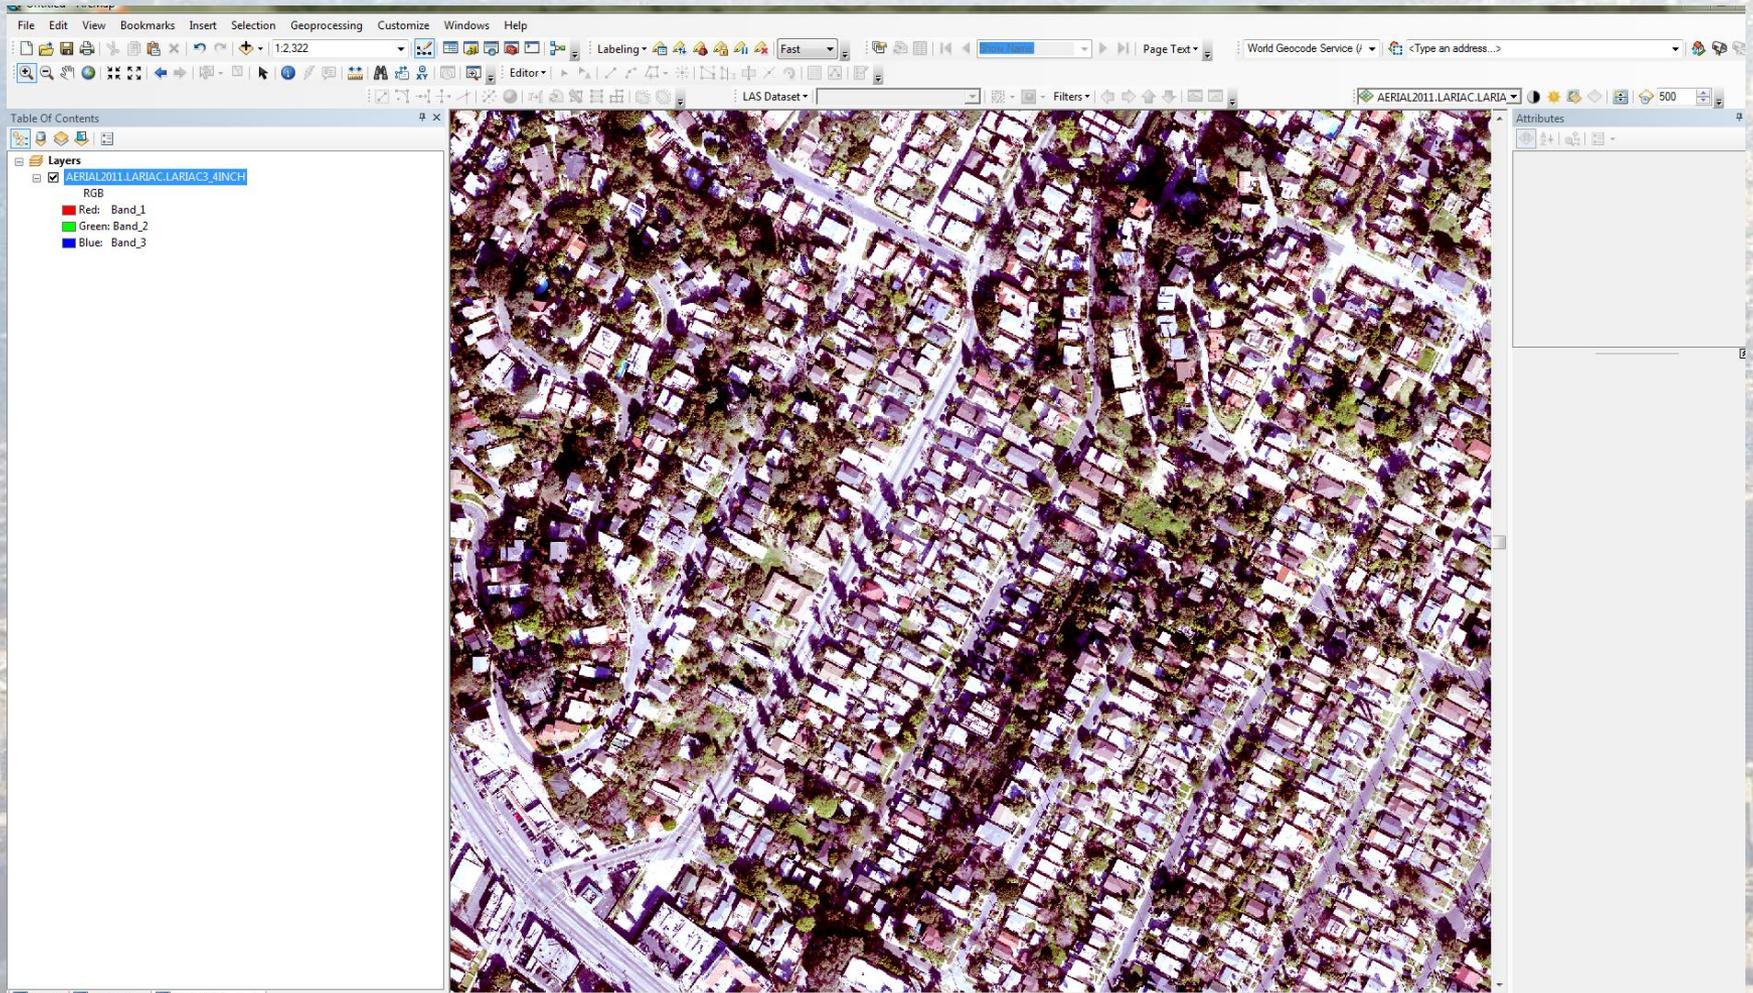

Orthogonal Imagery

- Raw imagery
 - .tiff files – the source data
 - JPEG 2000 files
- Compiled format
 - Raster Dataset (60% JPEG compression)
 - Combined to look like one image
 - Use right away
- Compressed format
 - ECW compression (20:1) for in vehicle use, etc.
- Online access from LA County
 - ESRI map service for inclusion in web sites ([example](#))

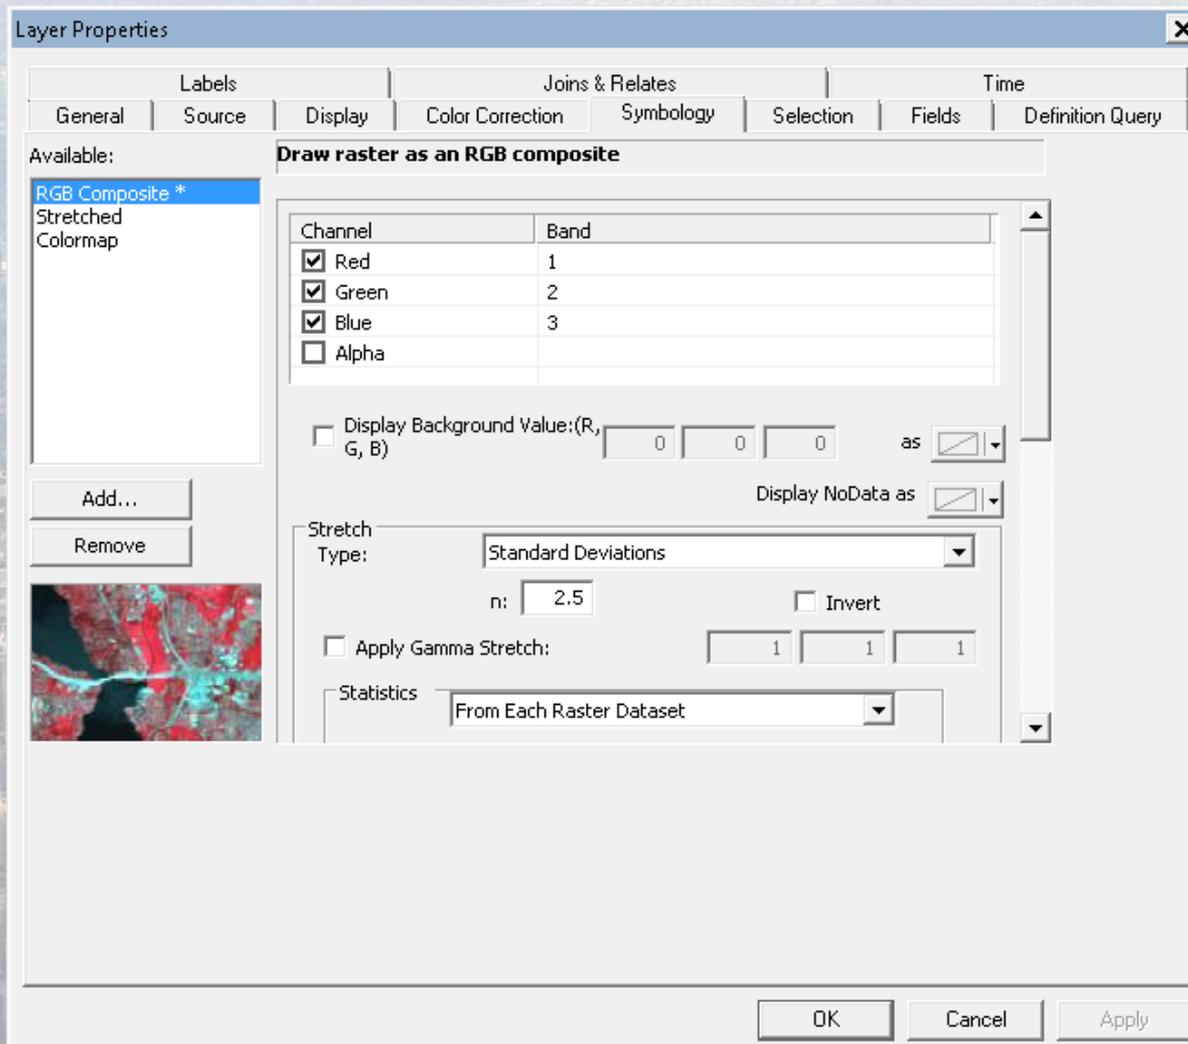

Some notes

- Various formats available in ESRI
 - Mosaic
 - Raster Catalog
 - SDE Export
 - **Raster Dataset (this is how it will be delivered)**

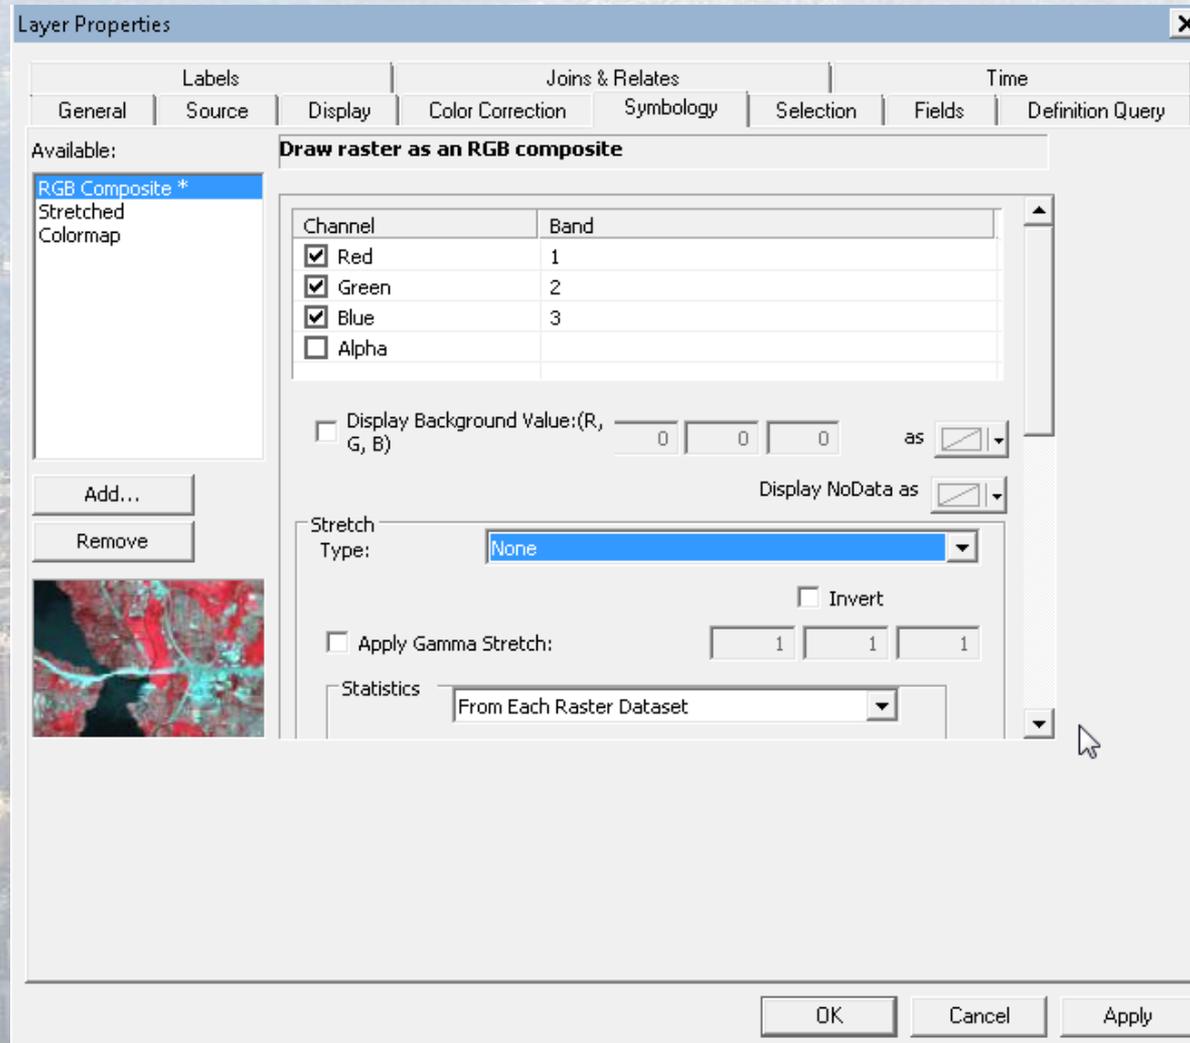

Image tone

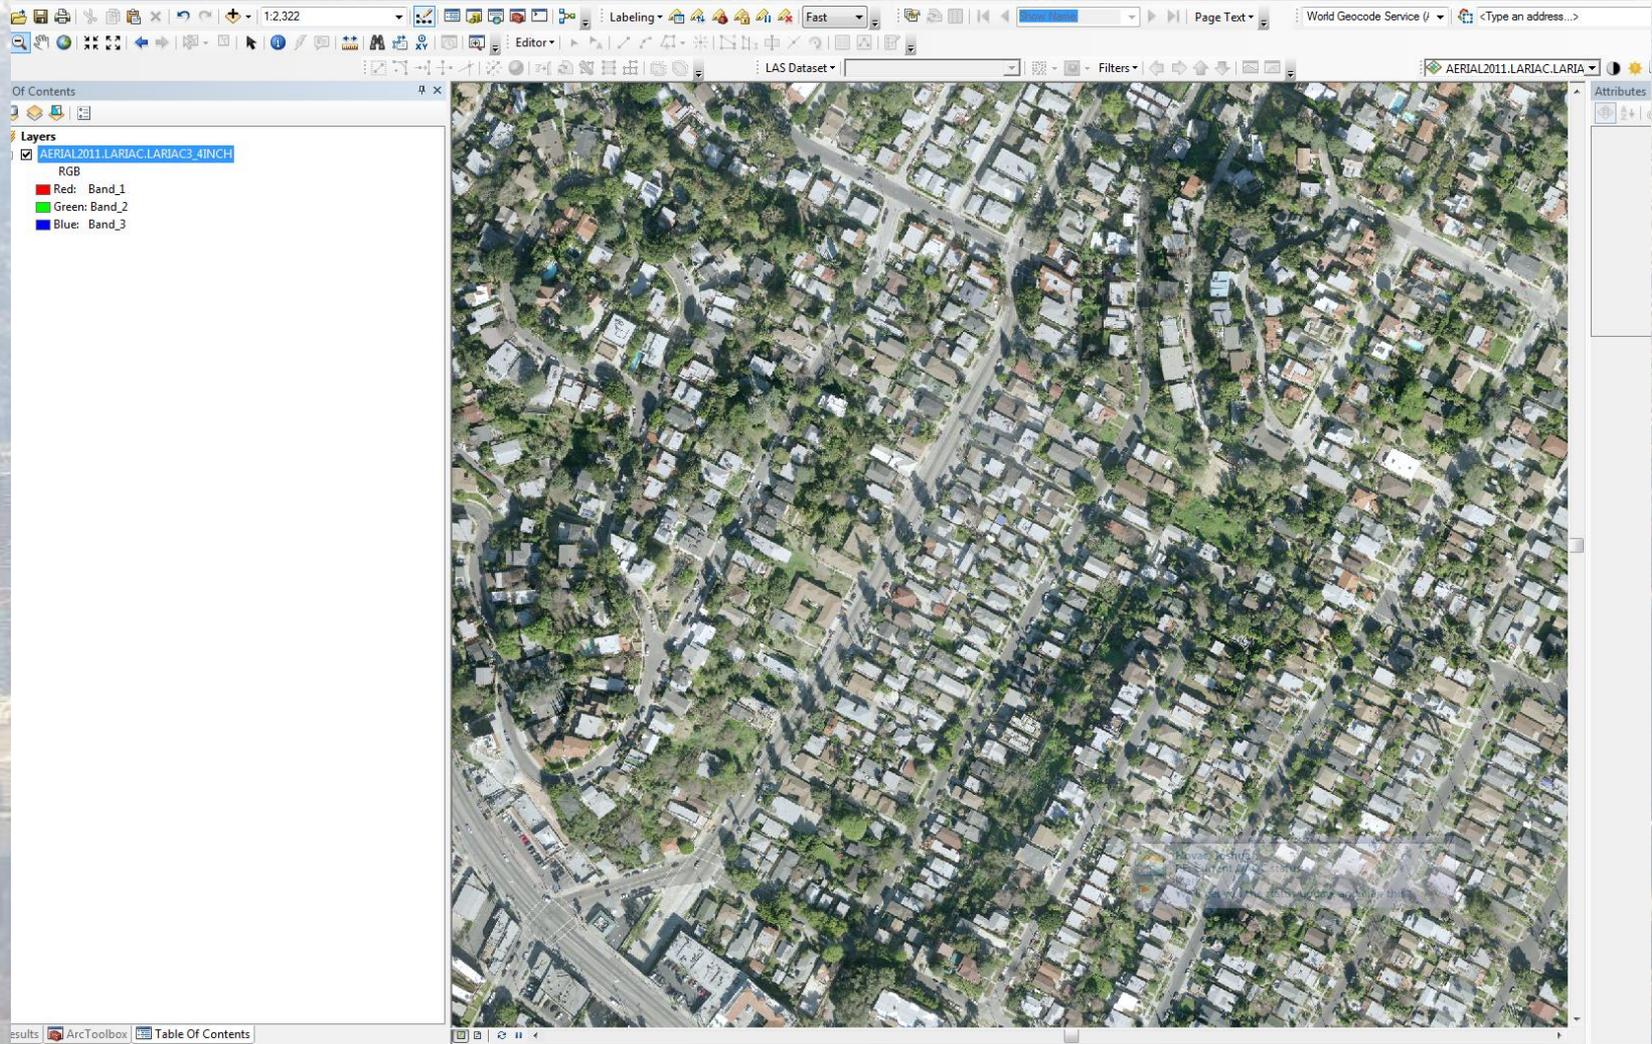

Don't use a stretch

Set to "None"

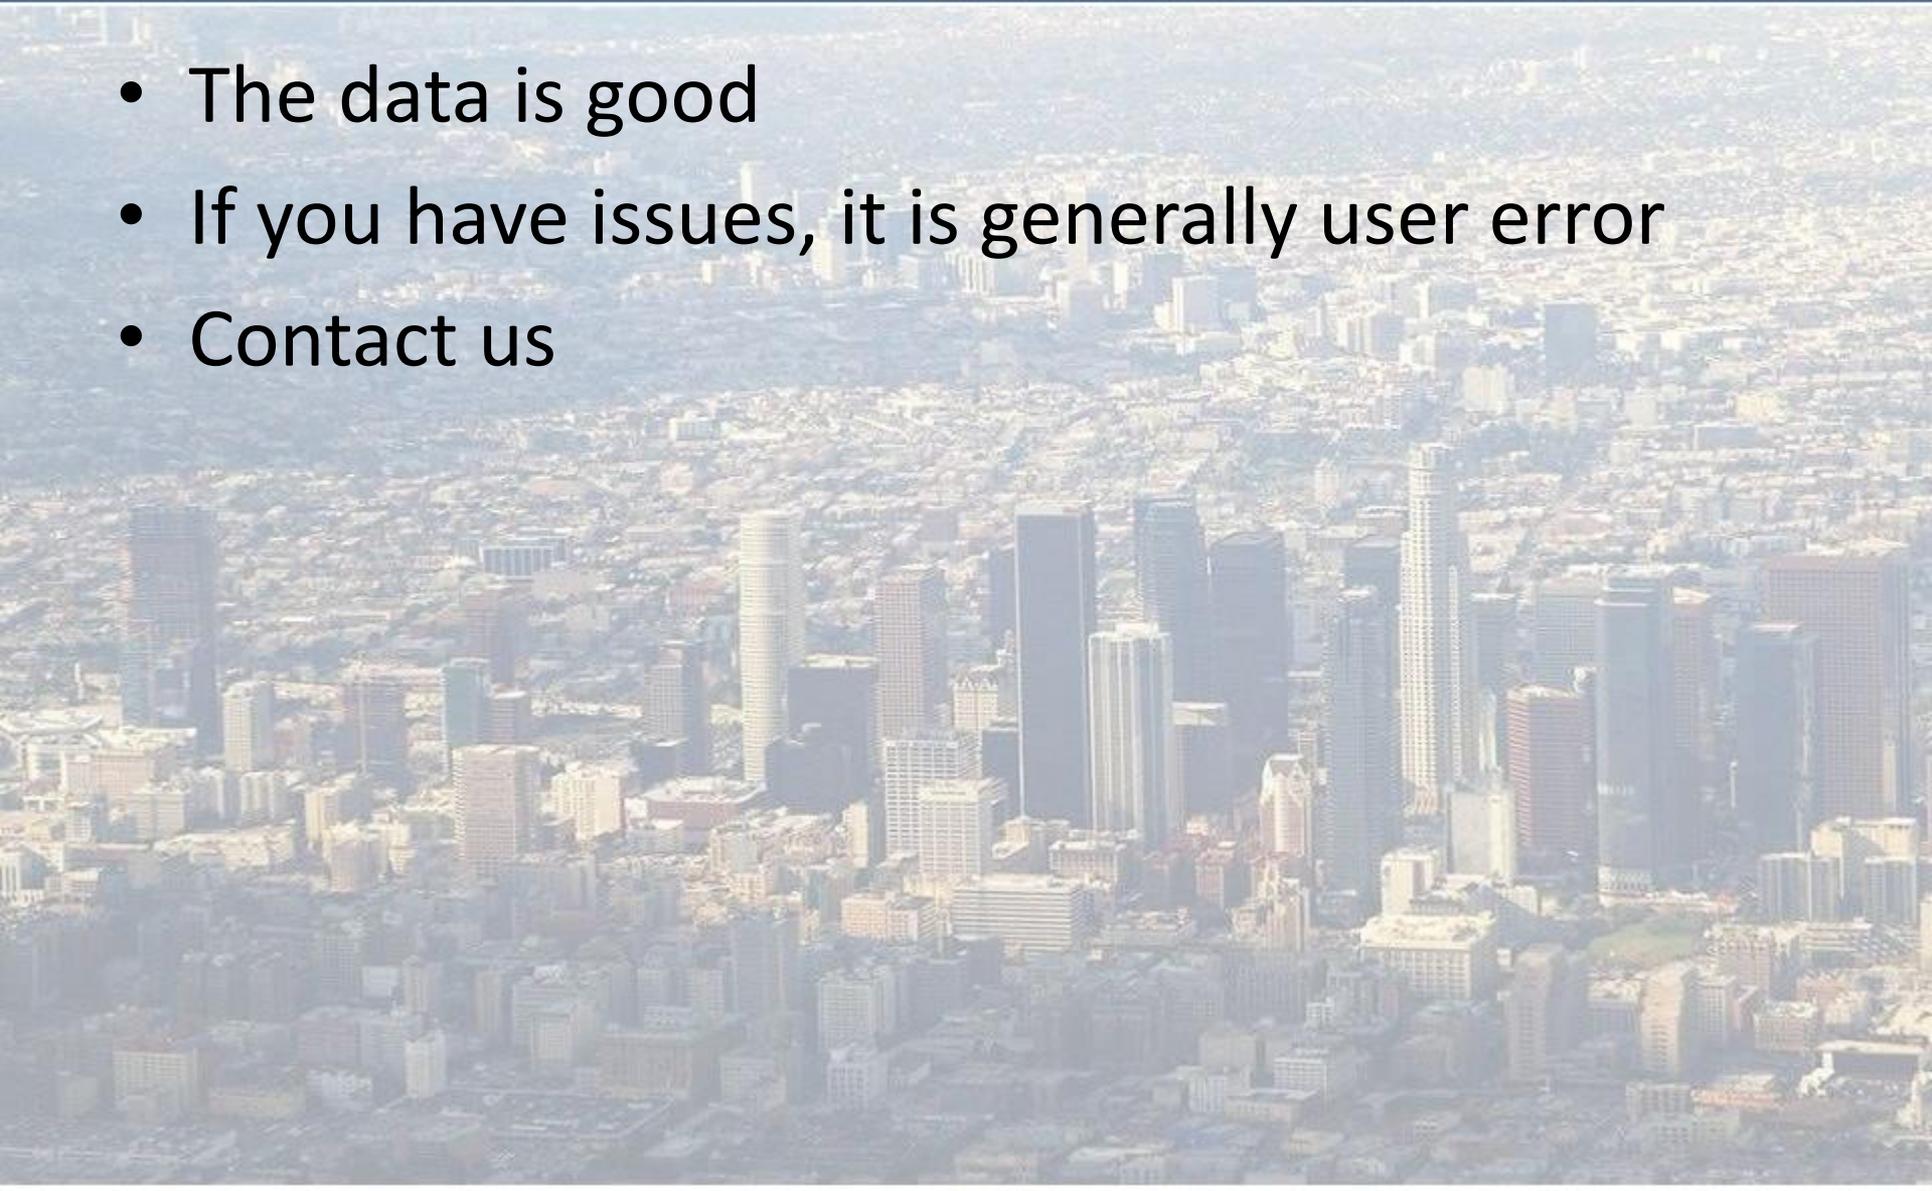

See – all nice!

Take-aways

- The data is good
- If you have issues, it is generally user error
- Contact us

Building Outlines

- Two shapefiles
 - Current buildings
 - Deleted buildings
- Current Building Data Structure
 - CODE (Building or courtyard)
 - BLD_ID – Unique ID
 - HEIGHT (Height in feet)
 - Elevation (Ground elevation)
 - Area (Building roofline in Square Feet)
 - Source (which provenance)
 - Date (data acquired)
 - AIN (Parcel ID)
 - Status (Unchanged, New, Replacement, Modified)
 - OLD_BLD_ID (connects to the Deleted Buildings ID)

Building Outlines

- Deleted Building Data Structure
 - CODE (Building or courtyard)
 - BLD_ID – Unique ID
 - HEIGHT (Height in feet)
 - Elevation (Ground elevation)
 - Area (Building roofline in Square Feet)
 - Source (which provenance)
 - Date (data acquired)
 - AIN (Parcel ID)
 - Status (Destroyed, Modified)
 - NEW_BLD_ID (connects to the Current Buildings ID)

An aerial photograph of a dense urban area, likely a major city, showing a vast expanse of buildings and skyscrapers. The foreground is dominated by a cluster of tall, modern skyscrapers, while the background shows a sprawling cityscape that fades into a hazy horizon. The overall tone is slightly desaturated, giving it a professional and somewhat somber appearance.

OTHER COUNTY PROGRAMS

An aerial photograph of a city skyline, likely San Francisco, showing a dense cluster of skyscrapers in the foreground and a vast, hazy urban area extending to the horizon. The text 'COUNTY GIS REPOSITORY' is overlaid in the lower-left quadrant of the image.

COUNTY GIS REPOSITORY

LA County GIS Repository

- A new feature of LARIAC
- Provide direct, read-only access to the County Enterprise GIS Repository.
- Enable participants to access our authoritative data directly – no need to download data from our data portal
- Eliminate duplicate effort.

What is the Repository

- 13 databases
- Organized by FGDC Theme
- Over 400 GIS data layers
- Many different sources

EGISDBP1 - AERIAL2011 as viewer.sde
EGISDBP1 - eGIS_Addressing as viewer.sde
EGISDBP1 - eGIS_Basemaps_Grids as viewer.sde
EGISDBP1 - eGIS_Boundaries_Admin as viewer.sde
EGISDBP1 - eGIS_Boundaries_Political as viewer.sde
EGISDBP1 - eGIS_Cadastral as viewer.sde
EGISDBP1 - eGIS_Demographic as viewer.sde
EGISDBP1 - eGIS_Elevation as viewer.sde
EGISDBP1 - eGIS_Environmental as viewer.sde
EGISDBP1 - eGIS_Hazards as viewer.sde
EGISDBP1 - eGIS_Hydro as viewer.sde
EGISDBP1 - eGIS_Infrastructure as viewer.sde
EGISDBP1 - eGIS_Services as viewer.sde
EGISDBP1 - eGIS_Transportation as viewer.sde

How do I access?

- Database is internal
- Requires VPN registration and access for an individual
- Is not designed for you to constantly connect
- Connect, download, disconnect, get to work.

Process

- Complete the Data Center registration form
 - A registration form is required for each individual
 - You become a “contractor” to the County.
 - You receive an RSA token for access to the County network.
 - Scan and email form to Mark Greninger
- County eGIS group provides data connection files.
- You learn how to connect to the county network
- You connect to our databases.

Data Center Registration Form

- Ignore #3
- Sign #27

[Print Form](#)

**COUNTY OF LOS ANGELES
DOWNEY DATA CENTER REGISTRATION**
For Contractors/Vendors

PROFILE INFORMATION — print or type completing boxes 1 – 9

(1) DATE OF REQUEST	(2) TYPE OF REQUEST (Check One) <input type="checkbox"/> REPLACE LOST/STOLEN SECUREID TOKEN <input type="checkbox"/> ADD NEW LOGON ID <input type="checkbox"/> CHANGE LOGON ID ACCESS <input type="checkbox"/> DELETE LOGON ID	(3) CONTRACT OR VENDOR NUMBER
(4) LAST NAME, FIRST NAME MI		(5) E-MAIL ADDRESS
(6) COMPANY/ORGANIZATION NAME		(7) COORDINATING L.A. COUNTY DEPARTMENT NAME / NUMBER
(8) WORK MAILING ADDRESS (STREET, CITY, STATE, ZIP)		(9) WORK PHONE NUMBER

IBM DATA CENTER ACCESS — complete each area for required access, as defined by L.A. County management

(10) LOGON ID	(11) 2-DIGIT MAJOR GROUP CODE	(12) 2-DIGIT LSO GROUP CODE	
<input type="checkbox"/> TSO ACCESS — check box and complete for required access, as defined by L.A. County management. Asterisks are optional data.			
(13) 2-DIGIT TSO GRP CODE	(14) SUB-GROUP 1 *	(15) SUB-GROUP 2 *	(16) SUB-GROUP 3 *

Data Center Registration Form

- Sign last page (both you and your manager)

system, or computer network.

- (8) Knowingly introduces any computer contaminant into any computer, computer system, or computer network.

I HAVE READ AND UNDERSTAND THE ABOVE AGREEMENT:

OPTIONAL

Employee's Name

Employee's Signature

Date

OPTIONAL

Manager's Name

Manager's Signature

Date

Next Steps

- Sign, scan, and email to me:
 - Mark Greninger (mgreninger@cio.lacounty.gov)
- I will be collecting the forms and processing in bulk.

Notes

- Practicality
 - When you connect to our network, the connection to your network is broken.
 - For concurrent use ArcMap users, you will need to “check out” a license (the connection to your license server may be broken).
 - Do not build maps that connect directly our databases
 - network speed may be limited.
- Program Design
 - One connection per city/department
 - Read only for now (we can discuss other storage later)

Programs

- County maintains GIS data through programs
 - LARIAC (imagery and elevation)
 - Parcels (Assessor)
 - Service Locations (211 & Location Management Systems)
 - CAMS (Countywide Address Management)
- CAMS is a collaboration
 - Maintain street centerlines and Address information
 - For dispatch, address lookup, and many other business functions.

CAMS

- CAMS is:
 - A collaborative program
 - Datasets (points and lines) - [downloadable](#)
 - A data structure and database
 - An editing environment
- CAMS needs
 - Cities to update their information in the system
- For more information see:
 - <http://egis3.lacounty.gov/eGIS/county-gis-projects/address-management-cams/>

Los Angeles Region – Imagery Acquisition Consortium (LAR-IAC4)

Questions/Comments?

Prepared by:
Los Angeles County

An aerial photograph of a dense urban area, likely a city center, featuring numerous skyscrapers and a high concentration of buildings. The image is slightly hazy, giving it a wide-angle, panoramic feel. The text 'COUNTY GIS SERVICES TO CITIES' is overlaid in the lower-middle portion of the image.

COUNTY GIS SERVICES TO CITIES

GIS Services

- County maintains a GIS infrastructure and GIS expertise
 - Cities may not have the resources to fully leverage GIS
 - Are there opportunities for the County to support cities with standard GIS tools and services?
 - Leverage collaboration to reduce cost to cities.
