

Request for Pricing (GSA)

This is our GSA pricing. GSA pricing is a 5% discount off of our list price and is available only from TerraGo Technologies and TerraGo licensed resellers. Pricing is as follows:

MAP2PDF for ArcGIS or GeoMedia: Extension for ArcGIS that allows you to export vector and raster files from your GIS to the GeoPDF file format.

Price: \$1,144.31 plus 20% annual maintenance

MAP2PDF for ArcGIS Server: Extension for ArcGIS server that allows you to export vector and raster files from ArcGIS to the GeoPDF file format.

Price: \$16,757.68 plus 20% annual maintenance

MAP2PDF Bundle: This is a bundle of software titles and tools and includes:

MAP2PDF for ArcGIS or GeoMedia – This allows you to export vector and raster files from your GIS to the GeoPDF file format.

MAP2PDF for Acrobat – Will allow for security and distribution management of GeoPDF files. This software is also a requirement when using any GeoPDF related tools.

Map Assembler – This tool will enable you to combine or edgematch multiple GeoPDF files into a single layered GeoPDF document.

GeoMark enable Tool – Allows for georeferenced commenting and markup with GeoPDF's in Adobe Reader. GeoPDF users in the Reader environment can also add attribute information to their comments and markups. Most importantly the GeoMark tool allows for comments, markups and attribute data collected in a GeoPDF to be saved as a shapefiles for true two-way collaboration.

GeoRegister Tool – Use this tool to georeference traditional PDF maps and convert them to GeoPDF's

Price: \$2,197.65 plus 20% annual maintenance

MAP2PDF Pro Bundle: The Pro bundle includes everything in the MAP2PDF Bundle but also includes MAP2PDF Pro for Acrobat. MAP2PDF Pro for Acrobat provides GeoPDF users with even more flexibility and functionality by automating the creation of georegistered, interactive mapbooks.

Price: \$5,740.69 plus 20% annual maintenance

MAP2PDF for Raster: This is a tool that we designed to create optimum file sizes of raster data in the GeoPDF file format. The USGS, NGA and engineering companies use this quite a bit to aid distribution of imagery to their non-GIS enabled personnel. MAP2PDF for Raster creates files sizes on the average of 1/5th the size of a GeoPDF in comparison to raster data exported to GeoPDF directly from ArcGIS.

Price: \$2,389.17 plus 20% annual maintenance.
