Subject:	[Configuration Editor New Releases, Updates, Tips and Tricks] Configuration Editor Version 2.0 Release 3 Now Available

Configuration Editor Version 2.0 Release 3 Now Available

We are pleased to announce the release of Configuration Editor Version 2.0 Release 3. **We recommend that all Configuration Editor users upgrade to this new release immediately.**

Now available for immediate download, this new Release includes the following feature improvements:

• Editing existing PCF files.
Existing Configuration files no longer can get corrupted when being modified using Configuration Editor.

• Improved Save functionality and security.
When Configuration Editor begins to save a .PCF file it will use a temporary file name. If there is an error saving the file, an error message will be displayed and the temporary file will be erased, leaving the original .PCF file intact. If the .PCF file is saved successfully, the original file will be saved as a backup. A time and date stamp will be added to the file name and the extension will be changed to .PCFB, and the temporary file will be changed to the original file name. .PCFB files will normally be hidden from the File > Open dialog box, but the user can choose to see them. If a .PCFB file is opened in Configuration Editor and then saved, the extension will be .PCF.

HOW TO OBTAIN THE NEW RELEASE
The new release of Configuration Editor can be obtained from our FTP site.

ftp.pictometry.com
Username: configeditor
Password (case-sensitive): pictometry

If you want to use Windows Explorer (not Internet Explorer) to access the FTP site:

• Launch Windows Explorer
• Type or paste the following text into the Address bar at the top:
ftp://configeditor:pictometry@ftp.pictometry.com
• Press ENTER and you will be logged in and see the Configuration Editor installation files in a ZIP file

Please contact Customer Support at 888-771-9714 x260 or customersupport@pictometry.com if you have any questions.

Regards,

Pictometry Customer Support
