New information on same-sex couples from the 2010 Census will be released, including the number of married couples and a set of preferred estimates of same-sex spouses and unmarried partners at the national and state levels. These estimates were developed to account for data capture errors that make it difficult to measure same-sex couple households. Estimates from the 2010 American Community Survey (ACS), along with a brief analyzing the ACS estimates are available here.

On the left side, there is a "Your Selections" box. It shows "Search using..." with "Search: 'H1'" and a red 'x' icon. Below that, it says "+ Census Tract" and "15 selected" with a red 'x' icon. At the bottom of this box is a link: "clear all selections and start a new search".

Below the "Your Selections" box is a section titled "Search using the options below:" with four expandable categories: Topics (age, income, year, dataset, ...), Geographies (states, counties, places, ...), Race and Ethnic Groups (race, ancestry, tribe), and Industry Codes (NAICS industry, ...).

The main search results area shows "Search Results: 1-3 of 3 tables and other products match 'Your Selections'" and "per page: 25". Below this, it says "1 Selected:" followed by icons for View, Download, Compare, and Clear All. There is a search input field with "GO" and a "1" page indicator.

Understanding Estimates and Margin of Error

Estimates

- ACS data are estimates
- ACS data are not counts of the population or housing
- Population counts are produced from the decennial census
 - Counts are updated throughout the decade through the Population Estimates Program

Margin of Error (MOE)

- **Margin of Error Definition:**
A measure of the precision of an estimate at a given level of confidence (90%, 95%, 99%)
 - MOEs at the 90% confidence level for all published ACS estimates
- **Confidence Interval Definition:**
A range that is expected to contain the population value of the characteristic with a known probability

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns.

An * indicates that the estimate is significantly different (at a 90% confidence level) than the estimate from the most current year. A "c" indicates the estimates for that year and the current year are both controlled; a statistical test is not appropriate.
