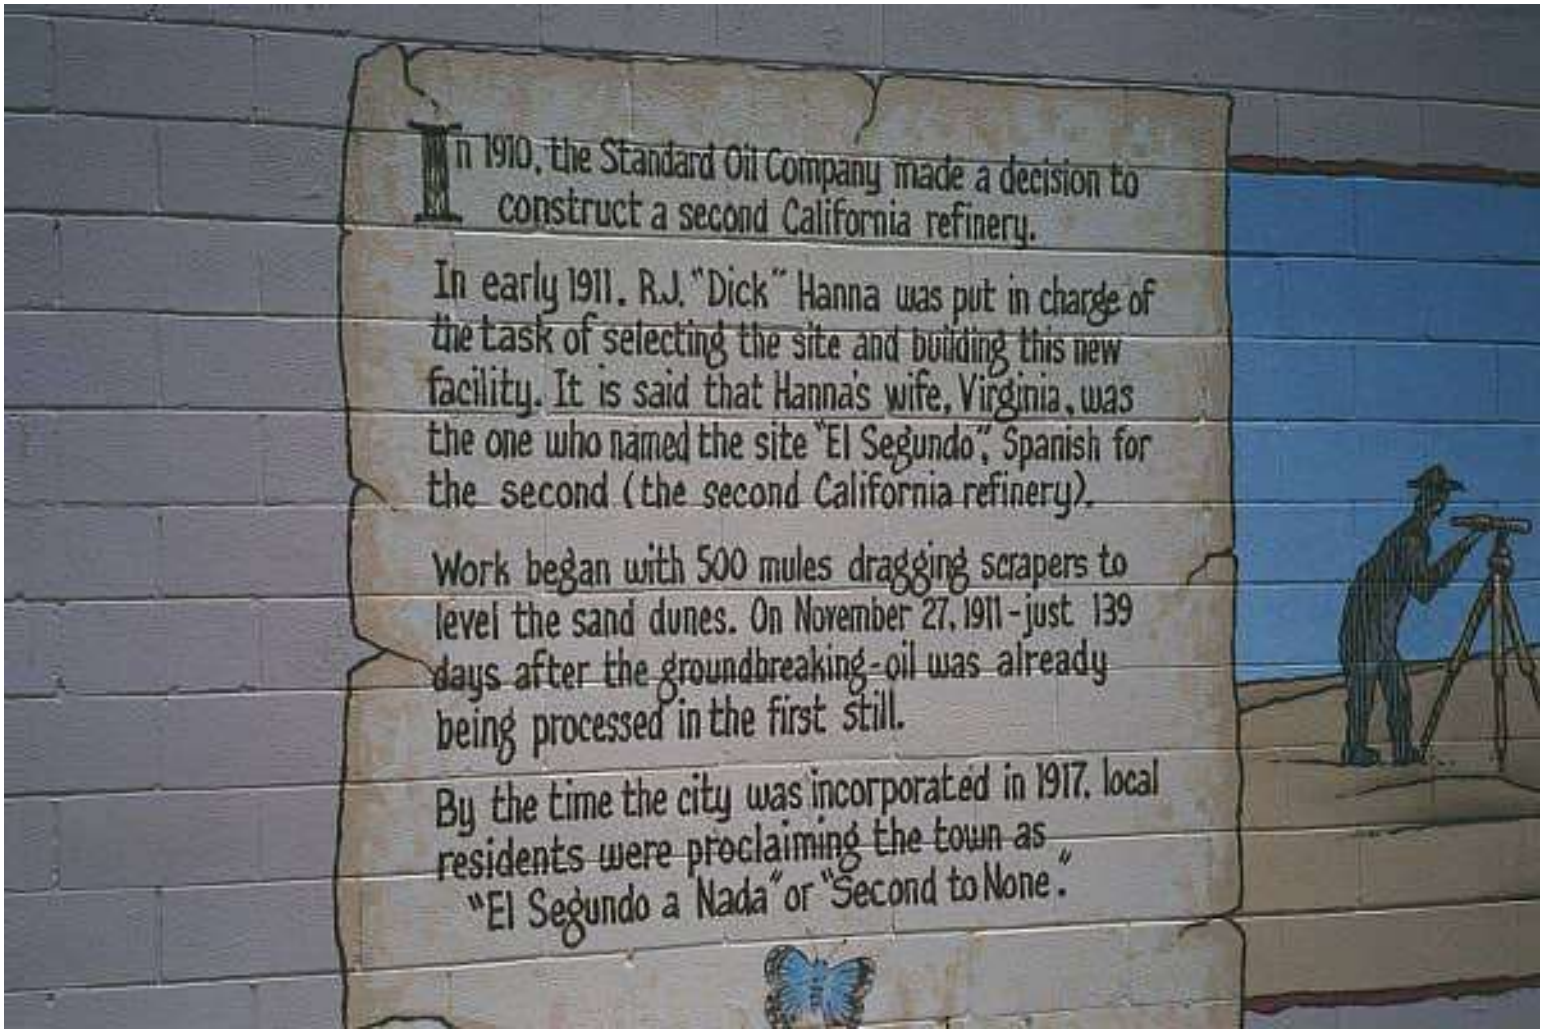
Farming in El Segundo 1905



In 1910, the Standard Oil Company made a decision to construct a second California refinery.
In early 1911, R.J. "Dick" Hanna was put in charge of the task of selecting the site and building this new facility. It is said that Hanna's wife, Virginia, was the one who named the site "El Segundo", Spanish for the second (the second California refinery).
Work began with 500 mules dragging scrapers to level the sand dunes. On November 27, 1911 - just 139 days after the groundbreaking - oil was already being processed in the first still.
By the time the city was incorporated in 1917, local residents were proclaiming the town as "El Segundo a Nada" or "Second to None."

What is the South Bay Cities COG GIS Working Group?

The South Bay Cities COG GIS Working Group gets its members from staff of 16 member cities, the Port of Los Angeles, Los Angeles County Sanitation District and CSU Dominguez Hills. Group members work to advance the use of technology in local operations through education and information sharing as well as coordinating joint projects. The timeline on this poster shows just some of our accomplishments over the past 16 years.

Councils of Government serve their local governments in a variety of ways. At the county and multi-county level they serve as the regional transportation planning agency under state law and the metropolitan planning organization under federal law. At the sub-county level like the South Bay Cities Council of Government (SBCCOG) they undertake functions ranging from assisting with regional economic development to acting as a storehouse for regional data and information. Most are formed as joint powers agreements of cities and counties, and all are governed by locally elected city council members and county supervisors.

COGs address issues that transcend local boundaries, which local officials have decided are better addressed by mutual cooperation and a unified local response to regional concerns. They prepare regional plans, set regional policy, strengthen the effectiveness of local government, and develop and maintain regional databases.

The SBCCOG was formed in 1994 as a joint powers authority of 16 cities and the County of Los Angeles, an area with a total population in 2010 of over one million people. Members share the goal of maximizing the quality of life and productivity of our area. While as cities we all value what makes us unique and independent, there are times when our collective endeavors get better results. This vision of what we can do for our communities is what motivates our members and can best be described three ways: Partnership, Persuasion and Performance.

The SBCCOG's activities include co-chairing the LA Air Force Regional Alliance, a government & business coalition that helps ensure the LA Air Force Base remains in the South Bay. It also acts as liaison with other governmental agencies including Southern California Association of Governments, Los Angeles County Department of Public Works, Los Angeles County Metropolitan Transportation Authority, Caltrans, and South Coast Air Quality Management District. It partnered with Southern California Edison and Southern California Gas Company to establish the South Bay Environmental Services Center, providing energy efficiency resources to cities, business, and residents - the first such program in the LA area.
