GIS Class @ LA DPW starts January 28th

Interested? Class will fill quickly. Here are some answers to frequently asked questions below. However, you should find all the steps in the link provided:

Where is the class?

There are 4 classes this semester. Three on campus at Rio Hondo College and there is one here at the Department of Public Works (Conference room E). Schedule of classes can be found here http://riohondo.isteaching.com/spring-semester-2014.html Note: disregard the schedule at the Rio Hondo registration page if it says location is at 'Department of Water and Power' (its Department of Public Works here in Alhambra)

When?

Spring semester starts the week of January 27th. First day of class at LA Public Works office is Tuesday January 28th at 6pm. Class at DPW meets Tuesday and Thursday nights from 6pm to 9pm

Can I register online?

Here are the steps. Please note, registration for you starts January 8th and 9th (goes by last name initial). Class will fill quickly. However, you will be unable to register unless you apply for admission which again can be done entirely online (takes normally two days and you will be provided your student number to then permit you to register for the class)

How do I register?

You can apply for admission and register entirely online. Here are the steps to guide you thru applying for admission and for registration. http://riohondo.isteaching.com/join-us/ If interested. Please apply for admission ASAP as class will fill quickly (and soon).

What are the requirements?

There is no prerequisite for the class to add GIS120 (Introduction). The An introduction class can be waived if you have experience in using or equivalent classes take elsewhere if registering for other classes such as the GIS220 Intermediate class (the class is already filled).

How large is the class?

Registration will be open for 24 seats. Do you have a certificate?

Information on the certificate is available here:

http://riohondo.isteaching.com/gis-certificate-new.html

Can I install the software on my personal laptop (or computer at home) to do lessons?

You will be provided the option to download and install ArcINFO (and Extensions). What is the cost?

Classes are 16 weeks long and fees can be found here:

http://riohondo.isteaching.com/step-four.html

Other benefits?

Many other resources are available including free day pass to the Esri International User Conference in San Diego, July 2014

More information can be obtained by contacting Warren Roberts wroberts@riohondo.edu
