29.R	E	F	E	R	E	N	C	E	D	A	T	U	M	

### Across

- Collection of geographic features with the same geometry type
- Mapping angle in the Lambert Mapping projection; a greek letter
- Equal parts of a whole; termed used in legal subdivisions
- Got coordinates? Get the address!
- introductory GIS school, popular among L.A. County employees
- Imagery, courtesy of the United States Department of Agriculture
- Atomicity, Consistency, Isolation, and Durability: a valid database
- Identification
- Access pattern of a data warehouse used to provide data to users
- U.S. committee which coordinates the sharing of geospatial data
- Global Spatial Data Infrastructure
- ETHiopia CONSerVation, land use planning in the highlands
- The 2018 FOSS4G, North America event was held in this state
- Datum plane or surface from which other quantities are measured

### Down

- The data frame you're currently working on
- ArclInfo command that removed overlapping features
- It points your label to a feature
- Spatial Data Infrastructure
- Commercial Off The Shelf software
- Globally Unique IDentifier, not short for Guido
- Former Los Angeles County Geographic Information Officer
- United States National Map Accuracy \_\_\_\_\_
- A path beginning and ending at the same location
- Distance above or below a reference datum
- The most popular geospatial vector file format today
- Bearing Object
- Type of photograph of the ground captured from an aircraft
- Official record of the dimensions and value of land parcels
- Identification
- ANALysis Of VARIance, a statistical procedure

*How many of these can you solve without a search engine? Collaborate!*
